QUESTION 1

A system administrator received a message that the System prerequisites check failed during the installation of the WebSphere Application server V6 Network Deployment package. Which log file should the system administrator review to find more information about the failure?

- A. SystemOut.log under \logs directory
- B. Log.txt under \logs directory
- C. Lo.txt under system temp directory
- D. SystemErr.log under \logs directory

Correct Answer: C

QUESTION 2

A performance analysis of a customer application revealed that the overhead of persistent HTTP sessions was the main contributor to performance slow down. All of the following factors will help with improving the performance of persistent HTTP session performance EXCEPT:

- A. Reducing the size of the session object
- B. Invalidating unneeded sessions
- C. Increasing the memory available
- D. Increasing the cache overflow size.

Correct Answer: D

QUESTION 3

Which of the following changes to an application server's configuration will cause the HTTP plug-in configuration file to be regenerated?

- A. The Web CONTAINER'S CLASS-LOADER POLICY HAS BEEN MODIFIED
- B. An application's class-loader policy has been modified
- C. A new application has been installed on the server
- D. The server's PMI monitoring level has been modified.

Correct Answer: C

QUESTION 4

When can a Data Replication Domino be created from the WebSphere Application Server V6 administrative console?

- A. While adding a new cluster member to the cluster or clicking on Cluster member -> Replication Domino -> New
- B. While creating the cluster or clicking on Environment -> Replication Domino -> New
- C. While configuring session management on each cluster member or clicking on Resources -> Replication Domain -> New
- D. The administrative console does not support creation of the Data Replication Domain at this time.

Correct Answer: B

QUESTION 5

Given the following JSESSIONID=000A2ABM41JozU_VM8lffsMNfdR:v544d0o0, what cluster member (clone ID) would this HTTP request be routed to?

- A. 000A2
- B. 0000A2AB
- C. v544d0o0
- D. Route cannot be determined from the above information

Correct Answer: C

QUESTION 6

A system administrator wants to share system information like Workload Management among core groups. Which of the following statements is valid in this context?

- A. Core groups in same or different sells use the service integration bus to share Workload Management information.
- B. Core groups can overlap by including common servers and the common servers are used to share Workload Management information
- C. Core groups in different cells can only use the core group bridge service to share Workload Management information
- D. Core groups use the core group bridge service to share Workload Management information

Correct Answer: D

QUESTION 7

Which of the follow statements MOST accurately describes the effect of increasing the JVM heap size?

- A. More objects will be created and the time required to garbage collect will decrease.
- B. Applications run longer before a garbage collection occurs.
- C. A larger heap size will cause the server to take loner to start.
- D. No measurable performance change will result from increasing the heap size.

Correct Answer: B

QUESTION 8

Non-IBM supported Web server (start, stop and change configuration) must be managed from the WebSphere Application Server V6 administrative console in a Network Deployment environment. Which of the following processes has to be started on the WebServer machine that has been configured as a managed node?

- A. Deployment manager
- B. Custom profile
- C. Node agent
- D. Application server

Correct Answer: C

QUESTION 9

A system administrator notices that web requests are falling on a particular application server which has already started. Which log files should be reviewed for application server errors?

- A. SystemErr.log.SystemOut.log
- B. startServer.log. stopServer.log.System Err.log.SystemOu.log
- C. SystemOut.log
- D. SystemErr.log

Correct Answer: A

QUESTION 10

When using the installation wizard to install the WebSphere Application Server v6 Network Deployment package, product binaries are copied to the installation directory. Which of the following will also occur as a result of the installation?

- A. A profile for deployment manager will be created by default.
- B. A profile for application server will be created by default
- C. A custom profile will be created by default
- D. A system administrator has an option to create a profile using the create profile wizard

Correct Answer: D

QUESTION 11

A system administrator is about to federate a node into a Network Deployment cell. The node's server has several applications installed and a Service integration Bus is defined on the node. Before federating the node, the system administrator must understand that the default behavior of the addNode operation is:

- A. To not carry over applications to the cell.
- B. To not carry over Service Integration Buses to the cell.
- C. To not carry over applications and Service Integration Buses to the cell.
- D. To carry over applications and Service Integration buses to the cell.

Correct Answer: C

QUESTION 12

Which of the following must a system administrator define when creating a JDBC provider at the cluster scope?

- A. All datasources for this JDBC provider at the cluster level.
- B. An XA data source implementation type, for the JDBC driver.
- C. The symbolic Variable used in the class path to the JDBC driver for each node in the cluster
- D. The J2C authentication data entry for the datasource at the cluster scope.

Correct Answer: C
