QUESTION 1

What are the characteristics of RAID Extents on a Dell EMC Unity system?

A. RAID extents contain at least two drive extents from the same drive. RAID extents always include drive extents from two different Drive Partnership Groups.

B. Number of drive extents within a RAID extent is determined by the drive capacity. RAID extents will not include drive extents from two different Drive Partnership Groups.

C. No RAID extents contain two drive extents from the same drive. RAID extents will not include drive extents from two different Drive Partnership Groups.

D. No extents contain two drive extents from the same drive. RAID extents are always 256 MB in size.

Correct Answer: D

QUESTION 2

What is a capability of the Dell EMC Unity Compression for File feature?

A. Compression of data is performed in a post-processing manner

B. Compression of data can be scheduled for non-production times

C. Can be enabled at any time on pools that support the feature

D. Can only be enabled on newly created pools without user data

Correct Answer: C

QUESTION 3

When using the Dell EMC SC Series "rule of thumb" for IOPS per drive numbers, what will deliver 7,500 back-end IOPS?

A. 36, 2.5\\'\\' 10K drives

B. 36, 2.5\\'\\' 15K drives

C. 36, 3.5\\'\\' 7.2K drives

D. 36, 3.5\\'\\' 15K drives

Correct Answer: B

QUESTION 4

What is the reason for using mirrored cache in Dell EMC Unity storage systems?

A. Provide a secondary copy of write data for the same Storage Processor

B. Provide a secondary copy of read cached data for the peer Storage Processor

C. Provide the only copy of read data for each Storage Processor

D. Provide a secondary copy of write cached data for the peer Storage Processor

Correct Answer: D
