QUESTION 1

Which two pieces of information must be specified while configuring VPNs in vCloud Air? (Choose two.)

- A. Firewall Information
- B. Customer Information
- C. Server-Side Information
- D. Edge Gateway information

Correct Answer: AC

QUESTION 2

What are three functions of a vCloud Connector Server? (Choose three.)

- A. Control vCloud Connector nodes
- B. Transfer connect from one cloud to another
- C. Coordinate the activity of the vCloud Connector
- D. Provide automation for vCloud Air
- E. Create the vCloud Connector User Interface

Correct Answer: ACD

QUESTION 3

In vCloud Air, which three options represent actions that will assign an IP address to a virtual machine? (Choose three.)

- A. Enabling DHCP
- B. Configuring a static IP address
- C. Assigning an IP pool
- D. Configuring DNS
- E. Enabling IGMP

Correct Answer: ACD

QUESTION 4

How many public IP addresses are provided with the Dedicated Cloud service of vCloud Air?

- A. Four
- B. Three
- C. Two
- D. One

Correct Answer: C

QUESTION 5

Which three statements show vCloud Air capabilities that provide administrators with a true hybrid cloud solution? (Choose three.)

- A. vCloud Air allows administrators to move Gen 3 cloud-native applications to the hybrid cloud.
- B. vCloud Air allows administrators to move existing workloads to the hybrid cloud.
- C. vCloud Air allows administrators to move Gen 2 applications to the hybrid cloud.
- D. vCloud Air allows administrators to replicate their existing datacenter automatically to the hybrid cloud.
- E. vCloud Air allows administrators to create new set of tools to manage their existing datacenter and hybrid cloud.

Correct Answer: ACD

QUESTION 6

What are three ways vCloud Air helps administrators overcome network compatibility constraints with vCloud Air? (Choose three.)

- A. Provides options to administrators to choose their own networking components.
- B. Includes an NSX Edge Gateway which behaves like a core switch with modules for advanced Layer 3 switching.
- C. Supports a bring-your-own security policy, which allows administrators to use their own third-party appliances.
- D. Helps administrators overcome network and security challenges by offering vCloud Air as just another remote site.
- E. Offers networking flexibility where customers can configure networking constructs at a granular level.

Correct Answer: BDE

QUESTION 7

What is the minimum configuration supported in the disaster recovery cloud?

- A. 20 GB RAM, 10 GHz vCPU, and 2TB of storage
- B. 120 GB RAM, 30 GHz vCPU, and 6TB of storage

- C. 20 GB RAM, 10 GHz vCPU, and 1TB of storage
- D. 10 GB RAM, 10 GHz vCPU, and 4TB of storage

Correct Answer: B

QUESTION 8

Which three options represent advantages on implementing VXLANs? (Choose three.)

- A. VXLANs provide distributed firewall services.
- B. VXLANs allow compute resources to be pooled across non-contiguous clusters.
- C. VXLANs allow full-encapsulation at Layer 2, which provides network security.
- D. VXLANs provide the ability to deploy completely customizable networks.
- E. VXLANs provide end-to-end data-link level encryption.

Correct Answer: BCE

QUESTION 9

A company's datacenter has been completely destroyed by a recent tornado and is looking to better protect business critical information and minimize downtime during unforeseen situations in the future. After engaging a consultant, a company is considering migrating to the VMware Hybrid Cloud solution.

What should the consultant recommend as the best starting point for migrating to vCloud Air?

- A. Modernize applications
- B. Extending existing applications
- C. Test and Development
- D. Disaster recovery

Correct Answer: C

QUESTION 10

Which two options correctly show how many public IP addresses are supported in each core cloud service offered by VMware? (Choose two.)

- A. Disaster Recovery Cloud Two IP addresses
- B. Virtual Private Cloud Two IP addresses
- C. Dedicated Cloud Two IP addresses

D. Disaster Recovery Cloud Three IP addresses

Correct Answer: AC
