QUESTION 1

Which three are examples where Enterprise Manager Cloud Control 12c Consolidation Planner will show source servers that do not map to destination servers?

A. Source servers that violated scenario compatibility constraints due to incompatible Oracle Home directory names

B. Source servers that violated scenario compatibility constraints due to incompatible location

C. Source servers that auto-mapping could not consolidate to any destination server due to mutual exclusivity based on the nodes of an Oracle cluster

D. Source servers that manual mapping could not consolidate to any destination server due to mutual exclusivity based on the nodes of a Real Application Cluster (RAC) database

E. Source servers that auto-mapping could not consolidate to any destination server due to mutual exclusivity based on the nodes of a RAC database

F. Source servers that manual mapping could not consolidate to any destination server due to mutual exclusivity based on the nodes of an Oracle cluster

Correct Answer: BDF

QUESTION 2

How does the National Institute of Standards and Technology define a Hybrid Cloud?

A. A combination of community and public Clouds for a single organization

B. Separate environments for use by multiple organizations

C. A combination of private and public Clouds for a single organization

D. A common environment for use by a group of related organizations

E. A combination of private and public Clouds for multiple organizations

Correct Answer: C

QUESTION 3

As self-service portal user in Enterprise Manager Cloud Control 12c, one may view:

1.

 Development Plans

2.

 Policies

Which two correctly describe these items?

A. Policies define security settings for an infrastructure or a platform.

B. Deployment plans allows the scaling up or down of your infrastructure by defining threshold values against metrics with associated actions.

C. Policies allow the scaling up or down of your infrastructure by defining threshold values against metrics with associated actions.

D. Deployment plans are saved request settings.

E. Policies define chargeback settings for an infrastructure or platform.

Correct Answer: BE

QUESTION 4

Which four types of resources can be made available by the Cloud Provider for self-service provisioning of Infrastructure as a Service?

A. LUNs

B. File systems

C. CPUs

D. Power distribution units

E. Memory

F. Baseboard Management Controllers

G. Network switches

Correct Answer: ACEF

QUESTION 5

How does Enterprise Manager Cloud Control 12c discover resources that are deployed by end users using self-service deployment?

A. The Enterprise Manager Agent discovers the newly deployed targets when a Cloud Control Administrator manually requests discovery.

B. Resources that are created by end-user deployment requests automatically become managed targets in Enterprise Manager Cloud Control when the resources are deployed.

C. The Enterprise Manager Agent discovers the newly deployed targets when a self-service user requests target discovery.

D. Resources that are created by end-user deployment requests become managed targets automatically only when the agent is restarted.

Correct Answer: B

QUESTION 6

Which two are true about Enterprise Manager Cloud Control 12c pools in Platform as a Service (PaaS) Zones?

A. The pools in PaaS zones may be collections of one or more Oracle Database Homes of the same platform and version.

B. The pools in PaaS zones may be collections of one or more Oracle Middleware Homes of different platforms, as long as they are of the same template.

C. The pools in PaaS zones may be collections of one or more Oracle Database Homes of different platforms, as long as they are of the same version.

D. The pools in PaaS zones may be collections of one or more Oracle Middleware Homes of the same platform and version.

E. The pools in PaaS zones may be collections of one or more Oracle Database Homes of different versions, as long as they are on the same platform.

F. The pools in PaaS zones may be collections of one or more Oracle Middleware Homes of the same platforms, as long as they are of different templates.

Correct Answer: AD

QUESTION 7

Which two are true about templates and assemblies that self-service users can request?

A. They must have been published as software components.

B. They must have been imported to a storage repository.

C. They must have been requested at least once before.

D. They must be present in the Oracle Management Server\\'s Software Library.

E. The self-service user must hold valid licenses for any included licensed software.

F. They must have been downloaded from the Oracle Software Cloud or via self update.

Correct Answer: AB

QUESTION 8

Which three are true concerning Enterprise Manager Cloud Control 12c users who have been granted the
EM_SSA_ADMINISTRATOR role?

A. They may administer resource quotas for self-service portal users.

B. They may only administer Infrastructure as a Service (IaaS) Clouds, or Platform as a Service (PaaS) Clouds but not both.

C. Users who may administer Platform as a Service (PaaS) Clouds, may administer Database as a Service (DBaaS) or Middleware as a Service (MWaaS) clouds.

D. They may create Cloud infrastructure components, such as configuring Oracle Virtual Machine Manager.

E. They may administer privileges for self-service portal users.

Correct Answer: ACE

QUESTION 9

Enterprise Manager Cloud 12c installed on em12.example.com and OVM Manager is installed on six managed hosts, ovmmgr01.example.com through ovmmgr06.example.com.

The virtualization plug-in is not deployed on any of the managed agents in this topology.

Which option represents the management agent(s) that would be best for registering the OVM Managers running on ovmmgr01 through 06?

A. The central agent on em12

B. The agent on ovmmgr01

C. The agent on ovmmgr02

D. The agent on ovmmgr01 for ovmmgr01, ovmmgr03, and ovmmgr05; the agent on ovmmgr02 for ovmmgr02, ovmmgr04, and ovmmgr06

E. The agent on ovmmgr01 for ovmmgr01 and ovmmgr02; the agent on ovmmgr03 for ovmmgr03 and ovmmgr04; and the agent ovmmgr05 for ovmmgr05 and ovmmgr06

F. The agents on ovmmgr01 through ovmmgr06 for the corresponding OVM Manager

Correct Answer: D

QUESTION 10

Which three are valid cost calculations for a Universal Charge Plan for Enterprise Manager 12c Cloud Control self-service targets?

A. Memory allocation of $4 per gigabyte per week

B. Storage allocation of $5 per gigabyte per month

C. Database instances at $10 per month per instance

D. CPU usage for a default CPU architecture at $3 per hour

E. Database instances for version 11.2.0.3 at $10 per month per instance

Correct Answer: BCE

QUESTION 11

Which three actions are available to a self-service portal user in Enterprise Manager Cloud Control 12c?

A. Delete a database that you had deployed previously.

B. Request additional storage for any part of your current infrastructure.

C. Request new infrastructure for a catalog of all existing provisioning procedures.

D. Create a new assembly.

E. Request new infrastructure from a catalog of all provisioning procedures that the self-service user has privilege to use.

Correct Answer: ABD

QUESTION 12

Which three types of users can create artifacts in the Software Library in Enterprise Manager Cloud Control 12c?

A. Enterprise Manager administrators

B. Enterprise Manager users who are granted the public role

C. Database as a Service (DBaaS) self-service administrators

D. Enterprise Manager users who are granted the EM_CBA_ADMIN role

E. Middleware as a Service (MWaaS) self-service administrators

Correct Answer: ABC
