QUESTION 1

You customer from an IT company decides to go with an end-to-end virtualization approach so that the company could reduce capital investment and operational savings. What Cisco product will you recommend?

- A. Cisco MDS family
- B. Cisco Catalyst switches
- C. Cisco Unified Computing Systems
- D. Cisco Nexus 7000 Series Switches

Correct Answer: C

QUESTION 2

As you know, the Cisco solution is better than the Brocade one. Can you point out one of the features that have been provided by Cisco but not Brocade up to now?

- A. consolidation of isolated SANs
- B. N_Port Virtualizer
- C. support for FCoE and DCE
- D. inherited technologies from McData and In Range

Correct Answer: B

QUESTION 3

As an experienced Cisco seller, you know that Cisco differs from the competition within the virtual storage area network environment. Cite an example, please.

- A. Separated physical fabrics allow for greater flexibility.
- B. There are multiple points of management.
- C. All switches reside in a single physical fabric based on a single Cisco MDS.
- D. The unique Cisco deployment of LSANs reduces latency in the data stream.

Correct Answer: C

QUESTION 4

A new Cisco Nexus 7000 Series Switch has been configured in the data center architecture. At which layer might it be found?

- A. At the access layer
- B. At the access layer or the core layer
- C. At the aggregation layer
- D. At the core layer or the aggregation layer

Correct Answer: D

QUESTION 5

It is possible for a user to run Cisco storage networking solutions in cooperation with his Brocade and legacy McData switches. It is supported by what feature?

- A. Line card expansion modules may have Fibre Channel ports, 10 Gigabit Ethernet ports, or a combination of both to accommodate switches from other vendors.
- B. Cisco storage networking devices can run either the Cisco MDS SAN-OS or Cisco NX-OS operating system to match the operating systems that are running on devices from other vendors.
- C. Interoperability modes allow VSANs to be propagated from the Cisco MDS to other Fibre Channel devices.
- D. Because Fibre Channel is based on a set of open standards, Cisco solutions are fully compatible with other Fibre Channel devices.

Correct Answer: C

QUESTION 6

The Cisco Nexus 7000 Series Switches have a feature called virtual device contexts. Which product supports the virtual device contexts feature?

- A. Only the Cisco Nexus 7000 Series supports virtual device contexts.
- B. Most major network manufacturers have products that support virtual device contexts.
- C. Cisco Catalyst 6500s support virtual device contexts when they are connected together to create a single virtual switch.
- D. Force 10's E1200i and the Cisco Nexus 7000 Series are the only products in the industry that support virtual device contexts.

Correct Answer: A

QUESTION 7

Which option describes "blade switches" best?

- A. end-of-row switches

- B. modules that fit into MDS switches
- C. top-of-rack switches
- D. modules that fit into blade server chassis

Correct Answer: D

QUESTION 8

The Pass4sure Company is considering network-based virtualization. It will bring what advantage to the overall virtualization strategy for the data center most likely?

- A. merging the core and aggregation layers
- B. combining ports for high availability and redundancy
- C. carrying multiple protocols across the same network
- D. deploying multiple service contexts on the same hardware

Correct Answer: D

QUESTION 9

Which statement is correct when contrasting the Brocade LSAN and the Cisco VSAN?

- A. The Brocade LSAN is a next-generation version of the Cisco VSAN.
- B. The Cisco VSANs and the Brocade LSANs are basically the same concept.
- C. The Cisco VSAN can allow a single physical fabric to be logically segmented; the Brocade LSAN needs physically separated fabrics.
- D. The Cisco VSAN delivers security between environments by creating multiple physical fabrics, while Brocade's LSAN allows a single physical fabric to be logically segmented and, as a result, compromises security between environments.

Correct Answer: C

QUESTION 10

Refer to full-width blades, which statement is making sense?

- A. Up to eight full-width blades may fit into a single Cisco UCS 5100 enclosure.
- B. Full-width blades feature four times as many dual-port adapters as half-width blades.
- C. Full-width blades feature a pair of Intel Xenon processors.
- D. Full-width blades feature four times as many DIMM slots as half-width blades.

Correct Answer: D

QUESTION 11

You are describing to your customers how much the potential financial savings would be if they have virtualized network services modules. Which one of the following statements is suitable?

- A. Virtual services modules can support up to a maximum of four virtual contexts, so they can save up to 75 percent of both power and rack space.
- B. The savings will depend upon the requirements for each data center but can be as much as 80 percent on power and 30 units of rack space.
- C. Because the services are virtual, virtual network services modules will take up no rack space and will consume no power.
- D. Every time a new virtual context is created, the services modules draw 50 percent more power than a single-context operation, so the maximum number of virtual contexts is limited to four per module. With the maximum of four virtual contexts, the total power consumed is 250 percent of a single context operation, which is 150 percent less power than four physical service appliances would draw.

Correct Answer: B

QUESTION 12

The Cisco UCS deployment could help position the Cisco green data center initiative through: (Choose two)

- A. the addition of the power control unit
- B. the exclusive transmission of data across 10 Gigabit Ethernet connections
- C. the ability of several server blades to reside within the same chassis
- D. the ability to pair two Cisco Catalyst 6500 Series Switches and deploy them as a single virtual device

Correct Answer: AC
