QUESTION 1

Which services component within the prepare phase provides financial justification and business benefits for a customer to review and evaluate before investing in the technology?

- A. Technology Strategy Development
- B. Statement of Work Development
- C. Business Requirements Development
- D. Executive Summary Development
- E. Business Case Development

Correct Answer: E

QUESTION 2

Which of the following is a benefit of the operations plan service component within the design phase?

- A. finalizes the location and number of pieces of equipment to be staged
- B. ensures that the final design meets the business and technical requirements of the customer
- C. helps reduce disruptions caused by unexpected events during network operations
- D. helps identify and reduce costly delays and problems in the implementation process
- E. helps to accelerate the implementation of an advanced technology
- F. helps the customer understand the overall costs to build and operate the network

Correct Answer: C

QUESTION 3

Which of following best describes customer benefits in delivering network readiness assessment services in plan phase?

- A. improve its ability to achieve business goals by identifying and aligning advanced technologies with business requirements
- B. improve its return on investment and speed migration by improve its ability to identify, understand, and plan for necessary changes in infrastructure or resource
- C. ensure that key employees understand all of the implementation steps
- D. reduce the amount of risk it is exposed to by using proven project management methodologies and risk mitigation strategies

Correct Answer: B

QUESTION 4

Which service component within the design phase does the following describe? Consider the customer's defined business requirements and the associated performance, availability, resiliency, maintainability, resource capacity, and security criteria used to measure and assure the delivery of the required services.

- A. Staging Plan
- B. Implementation Plan
- C. Business Plan
- D. Detailed Design Validation
- E. Project Kick-off

Correct Answer: B

QUESTION 5

The change management service component in the operate phase provides which possible benefit?

- A. ensures the accuracy, completeness, and timeliness of information on the network
- B. contributes to reducing operating costs by providing a consistent framework for making necessary changes in an efficient and accountable manner
- C. notifies interested parties of problems identified, and escalates per customer requirements
- D. improves system service quality and reduces disruptions
- E. promotes productivity and efficiency in operations processes by enhancing control over the configuration of network devices and providing access to vital configuration data

Correct Answer: B

QUESTION 6

Which definition best describes the implementation service component within the implement phase? Select exactly 1 answer(s) from the following:

- A. providing a step-by-step plan that details the installation and service-commission tasks required in order to create a controlled-implementation environment that emulates a customer network
- B. assessing the ability of site facilities to accommodate proposed infrastructure changes
- C. developing and executing proof-of-concept tests, validating high-level infrastructure design, and identifying any

design enhancements

D. installing, configuring, and integrating systems components based on an implementation plan developed in earlier phases

E. improving a customer's infrastructure security system

Correct Answer: D

QUESTION 7

Which of the following best describe the customer benefits of change management in the operate phase?

A. reduce operating costs and limit change-related incidents by providing a consistent and efficient set of processes

B. reduce unnecessary disruption, delay, rework, and other problems by establishing test cases for use in verifying that the system meets operational, functional, and interface requirements

C. improve the return on investment and hasten migration by identifying and planning for necessary infrastructure changes and resource additions, as well as reduce deployment costs by analyzing gaps early in the planning process to determine what is needed to support the system

D. improve its ability to make sound financial decisions by developing a business case based on its business requirements and establishing a basis for developing a technology strategy

Correct Answer: A

QUESTION 8

Which plan phase service component involves evaluating how prepared a customer's current facility infrastructure is to support a new technology

A. Site Readiness Assessment

B. Proof of concept

C. Proposal development

D. Operations Readiness Assessment

Correct Answer: A

QUESTION 9

Which two tasks are executed in the change management service component with the operate phase. (choose two)

A. Identify key tasks and activities for problem management

B. Account for all system assets and configurations

C. Develop the migration plan

- D. Establish escalation notification plan
- E. Define software fix /upgrade process

Correct Answer: BE

QUESTION 10

In the operate phase, the action of isolating the incident belongs to which service component?

- A. Incident Management
- B. Problem Management
- C. Security Administration
- D. Change Management
- E. System Monitoring

Correct Answer: A

QUESTION 11

Which of these is the best definition of the Cisco Lifecycle Services approach?

Select exactly 1 answer(s) from the following:

- A. It defines the minimum set of services required to successfully deploy and operate a set of Cisco technologies.
- B. It determines how best to price Cisco products.
- C. It provides partners with a useful way to leverage Cisco resources.
- D. It consists of these phases: plan, deploy, support, and troubleshoot.

Correct Answer: A

QUESTION 12

Developing a plan that identifies specific activities required to take existing services and network architectures and implement them on a new platform or as new services is an activity of which service component in the design phase?

- A. Migration Plan Development
- B. Detailed Design Development
- C. Business Plan
- D. Staging Plan

E. Implementation Plan

F. Business Requirements Document

Correct Answer: A
