QUESTION 1

You have a server named Server1 that runs Windows Server 2012.

You install the Windows Deployment Services server role on Server1.

You plan to deploy Windows 8 to client computers by using Windows Deployment Services (WDS).

You need to identify which images are required for the planned deployment. The solution must use the minimum amount of images.

Which images should you identify? (Each correct answer presents part of the solution. Choose all that apply.)

- A. a boot image
- B. an install image
- C. a capture image
- D. a discover image

Correct Answer: AB

QUESTION 2

Your network contains an Active Directory domain named contoso.com. The domain contains client computers that are configured as shown in the following table.

Configuration name	Number	Architecture	Memory	Disk
Type1	100	x86	2 GB	400 GB
Type2	400	x64	4 GB	800 GB
Type3	1,000	x64	8 GB	1 TB
Type4	100	x64	16 GB	2 TB

You plan to deploy Windows 8 by using custom images. The images will be updated frequently. All of the images will have a 32-bit application named App1 preinstalled.

You need to recommend the number of Windows 8 images that must be created for the planned deployment.

How many images should you recommend?

More than one answer choice may achieve the goal. Select the BEST answer.

- A. 1
- B. 2
- C. 3

D. 4

Correct Answer: B

QUESTION 3

You need to recommend a change to the network to ensure that you can perform a bare metal deployment of Windows 8. The solution must meet the technical requirements. What should you recommend?

- A. On SRV-DP, enable PXE support for clients from the Configuration Manager console.
- B. On SRV-DHCP, configure options 66 and 67.
- C. On SRV-DHCP, install the Windows Deployment Services server role and configure option 60.
- D. On SRV-DP, install the Windows Deployment Services server role and configure a PXE Response Policy from the Windows Deployment Services console.

Correct Answer: A

QUESTION 4

You need to recommend a WSUS topology that meets the security requirements. What should you do?

- A. In the London office, install a WSUS server in replica mode. In the New York office, install a WSUS server in replica mode.
- B. In the London office, install a WSUS server in replica mode. In the New York office, install a WSUS server in autonomous mode.
- C. In the London office, install a WSUS server in autonomous mode. In the New York office, install a WSUS server in replica mode.
- D. In the London office, install a WSUS server in autonomous mode. In the New York office, install a WSUS server in autonomous mode.

Correct Answer: B

QUESTION 5

You need to recommend a solution for managing the user state of the virtual desktops. The solution must meet the sales department requirements.

What should you include in the recommendation?

- A. Roaming profiles and home folders
- B. Roaming profiles and Folder Redirection
- C. User profile disks and Folder Redirection

D. User profile disks and roaming profiles

Correct Answer: C

QUESTION 6

Your network contains an Active Directory domain named contoso.com. The domain contains three servers that are part of a Remote Desktop Services (RDS) deployment. The servers are configured as shown in the following table.

Server name	Roleservice
Server1	Remote Desktop Connection Broker
Server2	Remote Desktop Web Access
Server3	Remote Desktop Virtualization Host

You install a server named Server4 that runs Windows Server 2012.

You need to configure Server4 as a Remote Desktop Gateway (RD Gateway) server. The solution must ensure that a third-party certificate is used to encrypt connections to Server4.

Which three actions should you perform from Server Manager on Server4? To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Select the third-party certificate.	
Add an RD Gateway server to the RDS deployment.	
Add Server1 to the server pool.	
Add Server2 to the server pool.	
Add Server3 to the server pool.	

Correct Answer:

Actions	Answer Area
	Add an RD Gateway server to the RDS deployment.
	Add Server3 to the server pool.
Add Server1 to the server pool.	Select the third-party certificate.
Add Server2 to the server pool.	

Note:

* To configure RD Gateway settings

1. On the RD Connection Broker server, open Remote Desktop Connection Manager. To open Remote Desktop Connection Manager, click Start, point to Administrative Tools, point to Remote Desktop Services, and then click Remote

Desktop Connection Manager.

2. (box 2) In the left pane, click RD Virtualization Host Servers, and then on the Action menu, click Properties.

3. In the Virtual Desktops Properties dialog box, on the RD Gateway Settings tab, configure the desired RD Gateway behavior. You can configure whether to automatically detect RD Gateway server settings, to use RD Gateway server settings that you specify, or to not use an RD Gateway server. If you select Automatically detect RD Gateway server settings, the client tries to use Group Policy settings to determine the behavior of client connections to RD Gateway.

If you select Use these RD Gateway server settings, do the following:

a. Configure the RD Gateway server name and the logon method.

(box 3) The server name must match what is specified in the Secure Sockets Layer (SSL) certificate for the RD Gateway server.

Etc

* The server name must match what is specified in the Secure Sockets Layer (SSL) certificate for the RD Gateway server.

* You can specify whether users connect to virtual desktops by using Remote Desktop Gateway (RD Gateway). These settings are applied when a user connects to a virtual desktop pool or a personal virtual desktop through RemoteApp and

Desktop Connection. The RD Gateway settings apply to both virtual desktop pools and personal virtual desktops.

QUESTION 7

Your network contains a Virtual Desktop Infrastructure (VDI).

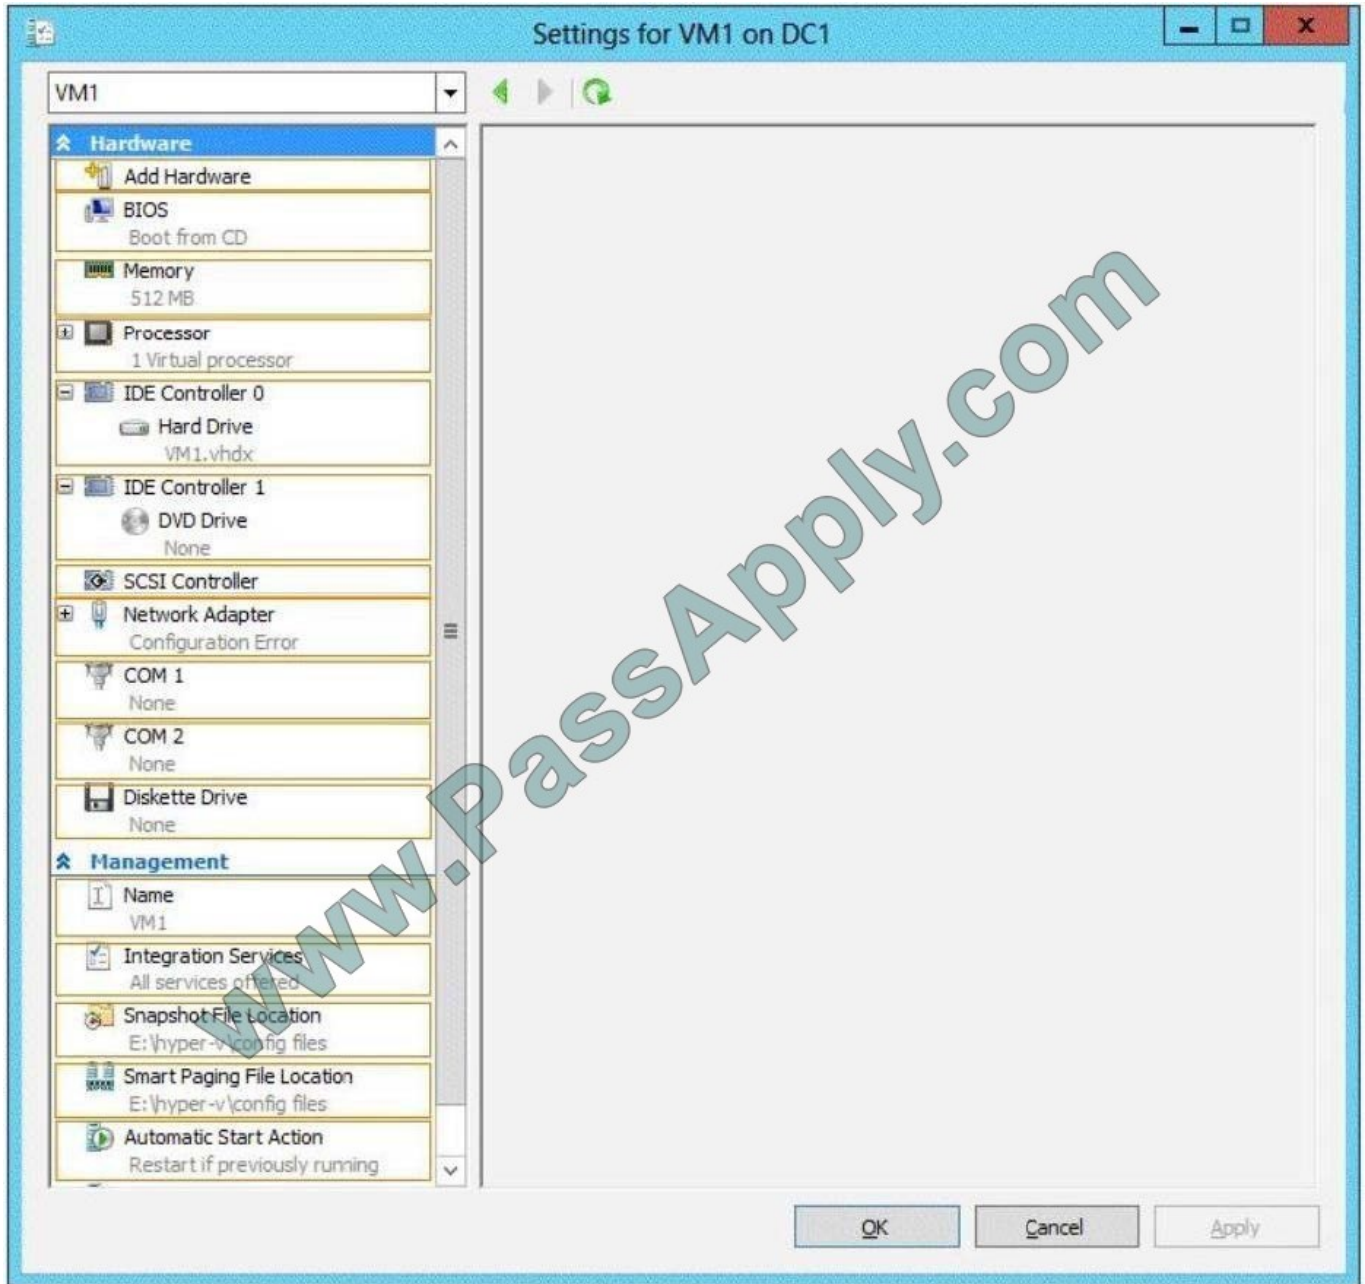

You have a virtual machine named VM1 that will be used as a virtual machine template.

You need to enable RemoteFX video support on VM1.

From which node should you perform the configuration?

To answer, select the appropriate node in the answer area.

Hot Area:

Correct Answer:

QUESTION 8

Your network contains a server named Server1 that runs Windows Server 2012.

You plan to deploy Windows 8 to 200 client computers to meet the following requirements:

Ten executive users must be able to use an application named App1. Other users must not be able to use App1.

All users must be able to use Microsoft Office 2010 when their client computer is disconnected from the network.

The solution must ensure that the amount of hard disk space used to store the images of Windows 8 is minimized.

You need to recommend an image deployment solution that meets the requirements of the planned deployment.

Which solution should you recommend?

- A. Deploy an image of Windows 8. Deploy Office 2010 by using Microsoft Application Virtualization (App-V). Deploy App1 by using Group Policy Software Installation.
- B. Deploy an image of Windows 8 that contains Office 2010. Deploy App1 by using Group Policy Software Installation.
- C. Deploy an image of Windows 8 that contains Office 2010. Deploy an image of Windows 8 that contains Office 2010 and App1.
- D. Deploy an image of Windows 8. Deploy App1 and Office 2010 as RemoteApp programs.

Correct Answer: A

QUESTION 9

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that has the Windows Deployment Services server role installed. Server1 hosts a single install image of Windows 8 (x64)

and 200 driver groups. Each driver group has a different set of filters configured.

You are preparing to deploy windows 8 to a new hardware model.

You need to recommend a solution to identify which drivers from the existing driver groups will be deployed to the new hardware model.

What should you do first?

- A. Create a prestaged device.
- B. Create a capture image.
- C. Install Microsoft Deployment Toolkit (MDT) 2012.
- D. Install the Microsoft Assessment and Planning (MAP) Toolkit.

Correct Answer: A

QUESTION 10

Your network contains an Active Directory domain named contoso.com. The domain contains a Virtual Desktop Infrastructure (VDI). The VDI contains four servers. The servers are configured as shown in the following table.

Server name	Role service
Server1	Remote Desktop Virtualization Host
Server2	Remote Desktop Connection Broker
Server3	Remote Desktop Web Access
Server4	Remote Desktop Gateway

You need to recommend a solution to track the amount of time required to create virtual desktops. What should you include in the recommendation?

- A. From Event Viewer on Server2, enable Analytic and debug logging.
- B. From Event Viewer on Server1, enable Analytic and debug logging.
- C. From Group Policy Object Editor on Server2, configure the Advanced Audit Policy.
- D. From Group Policy Object Editor on Server1, configure the Advanced Audit Policy.

Correct Answer: B

QUESTION 11

Your network contains an Active Directory domain named contcsc.com. The domain contains a server named Gateway1 that has the Remote Desktop Gateway role service installed.

You need to ensure that all of the users who connect to the Remote Desktop Session Host (RD Session Host) servers by using Gateway1 receive a custom logon message. The solution must prevent the message from appearing when the users connect to the RD Session Host servers directly.

What should you configure from Remote Desktop Gateway Manager?

- A. The RD Gateway-managed computer groups
- B. The properties of Gateway1
- C. The Remote Desktop resource authorization policies (RD RAPs)
- D. The Remote Desktop connection authorization policies (RD CAPs)

Correct Answer: B

QUESTION 12

Your company has multiple departments. The departments are configured as shown in the following table.

Department name	User characteristic	Requirement
Sales	Always work outside of the corporate office and cannot access the internal network.	All software must be preinstalled on the users' client computer.
Human resources	Always work from inside the internal network and are connected to the LAN.	Users must have core line-of-business applications preinstalled on their client computer and must be allowed to install additional productivity applications as needed.
Developers	Always work from inside the internal network and are connected to the LAN.	Users must have all software deployed by using Group Policy software assignment.

You plan to deploy Windows 8 to the client computers.

You need to recommend an imaging strategy for each department. The solution must minimize the amount of time required to deploy the images to the client computers.

Which imaging strategy should you recommend?

To answer, drag the appropriate image type to the correct department in the answer area. Each image type may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view

content.

Image Types	Answer Area
Thick	Sales
Thin	Human resources
Hybrid	Developers
	Image type
	Image type
	Image type

Correct Answer:

Image Types	Answer Area
	<p data-bbox="491 394 587 432">Sales</p> <p data-bbox="491 461 799 499">Human resources</p> <p data-bbox="491 528 687 566">Developers</p> <div data-bbox="852 383 1158 607"><p data-bbox="874 405 975 443">Thick</p><p data-bbox="874 472 995 510">Hybrid</p><p data-bbox="874 539 954 577">Thin</p></div>
