QUESTION 1

When should IBM Maximo Asset Management load testing be performed?

- A. during the implementation phase to expose performance problems
- B. during the design phase to ensure hardware is correctly sized for procurement
- C. during the go live phase to ensure the system is running per client requirements
- D. during the post-implementation phase to ensure satisfactory system performance level with active users

Correct Answer: A

QUESTION 2

There are several heap dump files visible when reviewing a customer's J2EE server system. Why?

- A. The Java heap has had several large memory objects.
- B. The Java heap has experienced memory fragmentation.
- C. The Java heap has experienced excessive compaction time.
- D. The Java heap has experienced an out of memory condition.

Correct Answer: D

QUESTION 3

What is the default logging level for the Maximo Root Logger?

- A. INFO
- B. WARN
- C. ERROR
- D. DEBUG

Correct Answer: A

QUESTION 4

What are two ways to run the Installation Prerequisite Verification utility? (Choose two.)

- A. from the Admin Mode utility
- B. locally from a command line

- C. remotely from a command line
- D. from the Maximo Integrity Checker utility
- E. from the IBM Maximo Asset Management installation launchpad

Correct Answer: BE

QUESTION 5

What is needed to implement encryption between the web browser and the IBM Maximo Asset Management V7.5 application?

- A. single sign-on
- B. a proxy server
- C. J2EE server security
- D. Secure Sockets Layer

Correct Answer: D

QUESTION 6

Which three LDAPSYNC parameters must be configured to successfully run the cron with a standard non-SSL connection and no custom User or Group Mappings?

- A. Port
- B. Principal D C Credential
- C. ChangePolling
- D. UserSearchAttribute
- E. GroupSearchAttribute

Correct Answer: BDE

QUESTION 7

While the installer is checking whether the deployment engine needs to be installed or upgraded, a message states that the deployment engine failed to initialize. Another technical colleague has told the administrator that occasionally locked files are left from an installation that was stopped before completion and that the files should be deleted from the log folder. Where does the administrator look?

- A. C:\IBM\SMP\logs
- B. C:\IBM\SMP\wasclient\logs

C. C:\IBM\SMP\CTG_DE\acsi\logs

D. C:\IBM\SMP\maximo\tools\maximo\log

Correct Answer: D

QUESTION 8

Which design principles should be followed when application clustering is intended to address fault tolerance in the environment to some level for user interface (UI) session handling?

A. The High Availability (HA) management design should include vertical and horizontal clustering. The UI systems should be vertically clustered. The other Java Virtual Machines (JVMs) should be horizontally clustered.

B. The HA management design should include horizontal clustering with a minimum of 2 systems and half the total number of UI JVM on each system.

C. The HA management design should have the number of JVMs needed to support the load of the system from a UI perspective as double what is required and be vertically clustered.

D. The HA management design should have the number of JVMs needed to support the load of the system from a UI perspective and be able to support the UI load with a single JVM removed.

Correct Answer: B

QUESTION 9

Which two log files can help determine whether the IBM Maximo Asset Management database is configured successfully? (Choose two.)

A. maxinst.log

B. dbconfig.log

C. updatedb.log

D. dropbackup.log

E. restorefrombackup.log

Correct Answer: AC

QUESTION 10

What must be installed on a database before IBM Maximo Asset Management V7.5 is installed?

A. text searching

B. full DBA rights

C. Maximo schema

D. index tablespace

Correct Answer: A

QUESTION 11

When the IBM Maximo Asset Management concurrent connection number drops below the threshold of minimum free connections, new connections are created based on which system property?

- A. mxe.db.initialConnections
- B. mxe.db.minFreeConnections
- C. mxe.db.newConnectionCount
- D. mxe.db.maxFreeConnections

Correct Answer: C

QUESTION 12

Which database pool property should be adjusted to address an issue with poor IBM Maximo Asset Management V7.5 performance during high amounts of simultaneous logins at server start up?

- A. mxe.db.initialConnections
- B. mxe.db.minFreeConnections
- C. mxe.db.newConnectionCount
- D. mxe.db.maxFreeConnections

Correct Answer: A

QUESTION 13

Sometimes it takes a user a long time to get to the Start Center. Which three queries should be checked for efficiency?

- A. KPI List portlets
- B. KPI Graph portlets
- C. Escalations portlets
- D. Results Set portlets
- E. Bulletin Board portlets
- F. Inbox/Assignments portlets

Correct Answer: ADE

QUESTION 14

What are the recommended initial and maximum heap sizes (in megabytes) for 32-bit and 64-bit IBM Maximo Asset Management Java Virtual Machines running on IBM WebSphere Application Server?

- A. 32-bit: Initial 512/Maximum 1024
- B. 32-bit: Initial 1536/Maximum 1536
- C. 32-bit: Initial 1536/Maximum 2048
- D. 64-bit: Initial 4096/Maximum 4096
- E. 64-bit: Initial 1024/Maximum 2048

Correct Answer: AE

QUESTION 15

What does the listiu command show?

- A. the installed IBM Maximo environments
- B. only the installed IBM Maximo products
- C. the deployed IBM Maximo environments
- D. the installed IBM Maximo, middleware, and deployment engine products

Correct Answer: D
