QUESTION 1

When adding devices to an LPAR, the devices in each planar of a drawer are identified separately in the HMC screen. Which of the following can be used to identify the drawer associated with that planar?

A. Choose the \\'Identify drawer\\' option from the pull-down menu for the planar.

B. Use the serial number that is supplied in the installation guide for the p690.

C. Left click on the planar listing and the location code will be displayed at the bottom of the HMC screen.

D. Left click on a slot within the planar adapter listing and the drawer name will be displayed at the bottom of the HMC screen.

Correct Answer: C

QUESTION 2

What task must be done immediately before upgrading the software on the HMC to save the system preferences?

A. Save upgrade data

B. Back up critical console data

C. Back up system profiles to diskette

D. Save system preferences from CEC properties

Correct Answer: A

QUESTION 3

What is the recommended way to recover from a hung partition?

A. Hard Reset the partition from the HMC

B. Soft Reset the partition from the HMC

C. Press reset button on operator panel D. Power off/Power on the partition

Correct Answer: B

QUESTION 4

What should be done to change resources in an active LPAR?

A. Modify the resource definitions while the partition is active. The changes will take effect when the partition is

deactivated by AIX with a shutdown -Fr.

B. Deactivate the partition with the AIX shutdown -F. Modify the resource definitions and activate the profile.

C. Deactivate the partition by using a soft reset from the pull-down menu. Modify the resource definitions and activate the profile.

D. Modify the resource definition while the partition is active. Activate the profile with the AIX shutdown -F.

Correct Answer: B

QUESTION 5

A p690 system is configured with three LPARs, which are all in a running state. The system administrator has created an additional profile (profileX) for LPAR2 and needs to make this the running profile. Which of the following actions need to be followed?

A. Issue shutdown -F in LPAR2 and activate profileX

B. Issue a soft reset command in LPAR2

C. Issue shutdown -Fr in LPAR2 and activate profileX

D. Choose deactivate LPAR2 and reactivate LPAR2 with profileX

Correct Answer: A
