QUESTION 1

A Sterling Connect:Direct for Windows administrator is customizing Connect:Direct Secure+ to enable Certificate Revocation List (CRL) checking. Which task below does NOT apply to this customization?

- A. Specify the certificate validation definition to use.
- B. Enable and configure the .Client record with TLS or SSL protocol.
- C. Update the .SEAServer record with the External Authentication Server host address and port.
- D. Enable and configure the remote node record with TLS or SSL protocol and enable external authentication.

Correct Answer: B

QUESTION 2

A Sterling Connect:Direct for Windows and UNIX administrator is configuring a connection with a new trading partner. The connection will use TCP/IP and the administrator will implement a process to copy files to the trading partner and then use the run task statement to run a program at the trading partner environment.

When sending files:

- Connect Direct must not wait longer than 60 seconds for a message from the remote node.
- The expected time to complete the task at remote node is about 120 seconds.
- Connect Direct must not wait longer than 180 seconds for the task to be completed.

Which two parameters should be customized to satisfy these requirements?

- A. pacing.send.delay
- B. tcp.max.time.to.wait
- C. tcp.api.inactivity.timeout
- D. runstep.max.time.to.wait
- E. conn.retry.exhaust.action

Correct Answer: BD

QUESTION 3

An administrator needs to implement Trusted Node security in Sterling Connect:Direct for z/OS. Which two of the following actions must the administrator take?

- A. Add the remote node name to the Authorization file.
- B. Add the remote node name to the Stage1 security exit.

- C. Add the remote node name to the Stage2 security exit.
- D. Verify that the fifth positional parameter in the netmap is set correctly.
- E. Code the Stage2 security exit to examine the SQEXTNOD flag in the SQCB.

Correct Answer: DE

QUESTION 4

A Sterling Connect:Direct for UNIX administrator needs to apply the latest maintenance to fix a known issue. The maintenance package and installation instructions have been downloaded from the IBM Support Portal. It is very important to review which document before continuing?

- A. User\\'s Guide
- B. Release Notes
- C. Administration Guide
- D. Getting Started Guide

Correct Answer: B

QUESTION 5

An administrator is in the process of installing Sterling Connect:Direct for UNIX for the first time on a new server. From the installation menu, what is the default installation option?

- A. Connect:Direct for UNIX Server
- B. Connect:Direct for UNIX File Agent
- C. Connect:Direct Secure+ Option for UNIX
- D. Connect:Direct for UNIX Server and Client(CLI/API)

Correct Answer: D
