	Create Welcome Text	 Customize the greeting displayed before logging on
Manage Install Resources · Add and remove operating environment instal image resources or the HMC	Manage Data Replication	Share customizable data between HMCs including custom group cata, customer information, and more
	Manage Install Resources	 Add and remove operating environment instal image resources or the HMC

A. "Change Network Settings" to open pott 22

B. "Remote Operation" to indicate that this HMC can be operated from a remote host

C. "Remote Virtual Terminal" to enable virtual terminal connections for remotely connected HMC

D. "Manage Task and Resource Roles" to give the hmcoperator task role permission to ssh to the HMC from a remote host

Correct Answer: A

QUESTION 2

Which of the following is a requirement for EtherChannel using HEA ports?

A. Dedicated HEA ports are supported as primary adapters when they are configured at different speeds within a single EtherChannel.

B. HEA logical ports can only be used as a backup adapter when the physical ports are configured as primary adapters in an EtherChannel.

C. When using HEA logical ports as primary adapters in an EtherChannel, the underlying physical ports must be in an EtherChannel at the switch level.

D. The \\'Internet Address to Ping\\' attribute must be enabled for logical HEA ports when the EtherChannel only includes primary adapters running at full duplex.

Correct Answer: C

QUESTION 3

Which AIX command will display the virtual SCSI slot number that is the parent of hdisk0?

A. Isdev

B. Iscfg

- C. Isattr
- D. Ismap

Correct Answer: B

QUESTION 4

One disk within a mirrored rootvg volume group failed and was replaced. What is the first action the administrator must take after re-establishing mirroring?

A. Create the boot image on the replaced disk.

- B. Recreate/dev/ipldevice.
- C. Re-enable volume group quorum.
- D. Copy/dev/hd5 to the new disk.

Correct Answer: A

QUESTION 5

Which command, when issued from the HMC command line, will attempt to launch a virtual terminal session on Ipar1, running on the sys1 managed system?

A. mkvterm-msys1 -p lpar1

- B. crvterm-ssysy -r lpar1
- C. startvt-h sys1 -l lpar1
- D. startx-vt sys1 -p lpar1

Correct Answer: A
