**QUESTION 1**

A solution developer codes a JavaCompute node using a getJDBCType4Connection API call to connect to a JDBC database that is globally coordinated, and then writes code to insert new records into that database based on the contents of incoming MQ messages. The solution developer observes that database inserts are not rolled back if the message flow experiences an error after this Compute node. What must the solution developer do to correct this?

A. Alter the code to use MbSQLStatement

B. Insert code to issue statements to rollback

C. Alter the Transaction Mode of the JavaCompute node to commit

D. Alter the type4DatasourceClassName property of the JDBCProvider

Correct Answer: D

**QUESTION 2**

A solution developer is requested to investigate a message flow using the DFDL parser that is performing slowly. The message contains several optional fields. The solution developer determines that the parser is backtracking extensively while parsing input messages. What action should the solution developer take to reduce the amount of time required to parse the messages?

A. Restructure the input messages.

B. Use the XML parser instead of the DFDL parser.

C. Include dfdl:discriminator and initiator keywords in the DFDL schema.

D. Force the parser to reduce backtracking by suppressing errors that occur at parse time.

Correct Answer: C

**QUESTION 3**

A message flow with a JMSInput node receives a message with a blank Message Domain. The message is a TextMessage and does not include a JMSType header. Which domain parser should the solution developer expect the broker to use?

A. XML

B. BLOB

C. XMLNSC D. JMSStream

Correct Answer: A

**QUESTION 4**

A solution developer creates a new broker instance containing the default execution group. The solution developer attempts to create a second execution group within the same broker and the operation fails. To correct the issue, the solution developer must:

A. upgrade the broker because it is running in Trial Edition mode.

B. upgrade the broker because it is running in Standard Edition mode.

C. run the default configuration wizard before creating the second execution group.

D. stop the first execution group from processing messages before the second execution group can be created.

Correct Answer: B

**QUESTION 5**

A broker application is deployed in a test environment. It is reported to be taking a long time to process messages. The solution developer is asked to find the average time taken by this broker application. The solution developer can determine this by enabling:

A. Service Trace

B. Resource Statistics

C. Message Flow Statistics

D. Message Queue Statistics

Correct Answer: C
