- B. Delete Reference
- C. Associate Records
- D. Modify Metadata Records

Correct Answer: C

---

#### QUESTION 2

Query sections are preferred over multi-record smart sections except for what instance?

- A. When the developer wants the records displayed in a vertical format.
- B. When there are a lot of records so the query section performance suffers.
- C. When the developer wants the user to be able to filter the data at runtime.
- D. When the developer wants to sort the records by clicking on a column header.

Correct Answer: A

---

#### QUESTION 3

Which statement is true about a Publish Name (also known as BO Mapping)?

- A. The Publish Name must start with a field.
- B. A Publish Name is not required to publish a BO.
- C. The Publish Name may not use multiple field values.
- D. Using multiple values for the Name field is allowed only if they come from different BO sections.

Correct Answer: A

---

#### QUESTION 4

Which property must be defined during the creation of a locator that will display information about a secondary business object record?

- A. the association string

- B. the Live Link Property
- C. the Edit Mapping Property link
- D. the secondary\\'s object forward association

Correct Answer: A

---

#### QUESTION 5

Which statement is true when choosing between using a smart section or locator field?

- A. A locator field allows live link; a smart section does not.
- B. A locator field can be overloaded with alternate data types; a smart section cannot.
- C. A smart section only creates an association; a locator field creates an association and a reference.
- D. A smart section can be mapped directly with data integrator using the keyword Associate; a locator field cannot.

Correct Answer: B
