QUESTION 1

Why is reusability an important aspect to promoting agility in SOA?

- A. Services often represent functions in an SOA.
- B. Existing applications may serve as the basis for service interfaces.
- C. The interface of a service allows it to be integrated into additional processes without changes.
- D. Service interface details may be defined at a high level according to anticipated business requirements.

Correct Answer: C

QUESTION 2

A company has prioritized their most important requirements for SOA to be the need to speed up integration, reduce application redundancy and provide the flexibility to change service implementations.

Which type of project should be recommended?

- A. Create a common metadata model that can be used for all development projects.
- B. Implement an Enterprise Service Bus (ESB) and registry/repository as a connectivity layer in the SOA architecture.
- C. Document the existing architecture, legacy systems, and interfaces. Make this available in a common repository that can be accessed by all developers.
- D. Use business modeling tools to model and simulate the application development process and identify bottlenecks. Address highest priority bottlenecks that can be automated to E.

Correct Answer: B

QUESTION 3

At which two points in SOA communication are registries used?

- A. During discovery
- B. During publication
- C. During message transport
- D. During message validation
- E. During message transformation

Correct Answer: AB

QUESTION 4

What is the impact of a service increasing in popularity in the absence of effective governance?

- A. Shared maintenance costs
- B. Increased service availability
- C. Capacity requirements may not be supportable
- D. Increased Return on Investment (ROI) for the service

Correct Answer: C

QUESTION 5

Which requirement is fulfilled by dynamic management of services during the execution in SOA?

- A. Meeting Service Level Agreements (SLAs) for Gold customers
- B. Assigning premiere customers to the Gold customer status
- C. Identifying an incoming request as coming from a Gold customer
- D. Changing a business process to provide enhanced capabilities for Gold customers

Correct Answer: A
