QUESTION 1

Which statement is true about a business process in the context of SOA?

A. It rarely includes any manual steps.

B. It can span people, systems and information.

C. It takes a relatively short amount of time to complete.

D. All services are linked to the process through an Enterprise Service Bus (ESB).

Correct Answer: B

QUESTION 2

A company has prioritized their most important requirements for SOA to be the need to speed up integration, reduce application redundancy and provide the flexibility to change service implementations.

Which type of project should be recommended?

A. Create a common metadata model that can be used for all development projects.

B. Implement an Enterprise Service Bus (ESB) and registry/repository as a connectivity layer in the SOA architecture.

C. Document the existing architecture, legacy systems, and interfaces. Make this available in a common repository that can be accessed by all developers.

D. Use business modeling tools to model and simulate the application development process and identify bottlenecks. Address highest priority bottlenecks that can be automated to E.

Correct Answer: B

QUESTION 3

When releasing a new service version, which changes to the WSDL document are backwardcompatible?
