QUESTION 1

How can disparate services communicate with each other in an SOA?

A. Use XML messages to provide interoperability.

B. Service providers adopt one common data model for all services.

C. Enforce a common data model at the Enterprise Service Bus (ESB) layer.

D. Business analysts create the integration logic details to negotiate between services.

Correct Answer: A

QUESTION 2

In which situation would a manufacturing plant most likely choose to use an SOA approach for their Customer Order Analysis and Tracking System?

A. The company wanted development and operations to be as simple as possible.

B. The company wanted to break down department silos and encourage everyone to use the same set of tools.

C. Most of the company\\'s processes were manual or document-centric with little opportunity for automation.

D. The legacy system had grown in such a way that it was not easy to update and could not handle the emerging business demands.

Correct Answer: D

QUESTION 3

What describes the purpose of the Enterprise Service Bus (ESB) in an SOA?

A. It provides separation of concerns so that each service can be managed separately.

B. It provides a design that allows components to be changed with less impact to the consumer.

C. It allows a service consumer to make a service request without knowing the details of the operation.

D. It implements service functionality by integrating existing back end service functionality using routing and transformation logic.

Correct Answer: B

QUESTION 4

If a component of the overall system is functionally complete and operates within that system independently from the functionality of the other components, it is an example of which SOA architectural concept?

A. Modularity

B. Extensibility

C. Loose coupling

D. Separation of concerns

E. Composite implementation

Correct Answer: A

QUESTION 5

Organizations that do not adopt SOA will experience which outcome?

A. The adoption of Web 2.0 technologies will be more problematic.

B. Outsourcing non-core business functions will become impractical.

C. The potential value of existing IT assets will not be fully realized.

D. The implementation of Web services to handle real-time transactions will not be possible.

Correct Answer: C
