QUESTION 1

The customer plans to add remote IP users when they implement VoIP on their network. What information about the customer's data network do you need to know to verify that remote users can be supported?

(Choose three.)

- A. codec administration
- B. network region for each remote user
- C. applications the remote user will be using
- D. bandwidth the remote user will have access to
- E. the average round trip between the VPN users and the voice network

Correct Answer: CDE

QUESTION 2

What is the preferred method for downloading firmware files to IP phones?

- A. TFTP is the preferred method, because it is better suited for large IP telephone deployments.
- B. HTTPS is the preferred method because firmware file downloads are encrypted using Transport Layer Security (TLS).
- C. TFTP is the preferred method because firmware file downloads can be encrypted using Transport Layer Security (TLS).
- D. There is no preferred method. Any of these addresses can be included in Option 176 within the DHCP scope.

Correct Answer: B

QUESTION 3

Several Avaya G700 Media Gateways controlled by an Avaya S8300 Media Server have been proposed to a multi-location customer. The customer has an existing WAN and has expressed concern about backup if the primary S8300 Media Server fails. Which is the best option to provide increased survivability?

- A. a separate WAN link to each site
- B. a dedicated survivable G350 LSP
- C. an LSP implemented on a remote location G700
- D. an LSP at the main location on the same G700 where the S8300 resides

Correct Answer: C

QUESTION 4

Given a migration from Definity Server R, release 10, to Communication Manager 4.0, which of the following is not supported?

- A. BX.25
- B. ISDN-BRI
- C. Fractional DS1
- D. TN1654 E1 mode

Correct Answer: A

QUESTION 5

A location has a single G700 Media Gateway with the following installed:

S8300 Media Server MM710 DS1 Module MM711 Analog Module

The enterprise uses all IP sets and soft phones in road warrior mode, and all use the G.729A codec and no encryption. They need to add a T1 facility. What is the minimum requirement necessary to accomplish this?

- A. MM710 Media Module only
- B. MM710 Media Module and G700 Media Gateway only
- C. MM710 Media Module and MM760 Media Resource Module only
- D. MM710 Media Module, MM760 Media Module, and G700 Media Gateway

Correct Answer: B
