### QUESTION 1

You are developing IP Telephony bandwidth requirements for WAN traffic between two S87xx sites. The client estimates that simultaneous non-IP Telephony traffic will occupy 1.5 Mbps. In addition, they estimate that using G.729, 55 simultaneous IP calls need to be provided access to the WAN link. What estimated bandwidth will the IP Telephony traffic add to the WAN traffic?

- A. 1.5 Mbps
- B. 275 Kbps
- C. 1650 Kbps
- D. 4675 Kbps

Correct Answer: C

---

### QUESTION 2

Your client's department store business has 24 locations worldwide. Each location has its own communications switch and is included in a QSIG network. The stores have standardized on specific extension numbers representing departments. The client is considering moving to a single, distributed S87xx system but is concerned with the loss of dial plan functionalities. Which three common platform-wide issues must be addressed? (Choose three.)

- A. "0" local attendant access
- B. identical names-group members in use in all stores
- C. identical department extension numbers in use in all stores
- D. same announcement extension numbers in use in all stores

Correct Answer: ACD

---

### QUESTION 3

Prior to implementing IP telephones in a new facility, you ask the customer what their strategy is for powering the IP telephones. They inform you they will be installing Ethernet switches that support 802.3af power. What is the most effective configuration that ensures the telephones will operate during a power outage?

- A. Install 802.11b wireless telephones as they do not require UPS
- B. Place the media server in the data center and the Ethernet switches that connects to the IP telephones on a UPS
- C. Place the media server in the data center and the Ethernet switches that are in the core, distribution, and access layers on a UPS
- D. Place the media server in the data center on a UPS and install a desktop power supply with a local battery backup for the IP telephone

Correct Answer: C

---

#### QUESTION 4

A client has an engineering location with ultra-high density LAN user requirements and a warehouse with very low-density user requirements. Which IEEE standard should be associated with each for a valid design? (Choose two.)

- A. Low-density locations incorporate 802.11b.
- B. Ultra-high density locations incorporate 802.11A.
- C. Ultra-high density locations incorporate 802.11g.
- D. Both high and low density users incorporate 802.11g.

Correct Answer: AB

---

#### QUESTION 5

When carrying voice traffic over VPNs, what negatively affects voice performance? (Choose two.)

- A. Network Address Translation (NAT)
- B. The additional delay due to the encryption process
- C. An acceptable level of service with the VPN provider
- D. Excessive packet loss, delay, and jitter for traffic crossing the Internet

Correct Answer: BD
