QUESTION 1

You are adding a new gateway into your network. You must make sure that it is running the latest Corporate approved IPS profile. How can you get this information to your new gateway?

- A. From the command line, run: `ips_import -f [-p]`.
- B. IPS profiles must be manually configured on each gateway.
- C. From the command line, run: `ips_export_import import -f [-p]`.
- D. From the Smart Dashboard IPS tab select import IPS profiles and select the gateway to get the profile from.

Correct Answer: C

QUESTION 2

Where can you configure Wire mode?

- A. In the gateway object in "Stateful Inspection"
- B. In the VPN community in "Advanced Settings"
- C. In `cpconfig`
- D. In Global Properties

Correct Answer: B

QUESTION 3

Which of the following is true about Node / Host objects?

- A. A Node / Host object can either have IPv4 or IPv6 IP address or have both.
- B. A Node / Host object can either have IPv4 or IPv6 IP address but not have both. Separate objects need to be created for hosts that use dual stack.
- C. A Node / Host object can only have IPv4 IP address. For IPv6, a Node / Host6 object must be used.
- D. Node / Host object does not support IPv6, hence a Network object must be created for IPv6.

Correct Answer: A

QUESTION 4

What is the log file that shows the keep alive packets during the debug process?

- A. `$FWDIR/log/ikev2.xml`

- B. \$FWDIR/log/ike.xml
- C. \$FWDIR/log/ike.elg
- D. \$FWDIR/log/vpnd.elg

Correct Answer: C

QUESTION 5

If the number of Firewall Workers for CoreXL is set higher on one member of a cluster than the other, the cluster will be in what state?

- A. Active/Standby
- B. Active/Ready
- C. Active Attention/Down
- D. Active/Down

Correct Answer: B
