**QUESTION 1**

You have users complain that they have no Internet access. Additionally, you have different Policy Layers configured to control Network Access, Web Filtering and Content. From the SmartLog you notice drop logs with the reason CPEarlyDrop. What is the main cause of this?

- A. Due to rulebase optimization, the connection is being blocked
- B. In-Line layers with a clean-up rule must be used to optimize the rulebase
- C. Ordered layers rulebase must contain a clean-up rule similar to main Access layer to avoid implicit drop and optimize the rulebase
- D. This is the new implicit block in R80 gateways because there is no clean-up rule in at least one of the policy layers

Correct Answer: A

QUESTION 2

What is the purpose of a Management server?

- A. The sole purpose of the Management server is to store the log files sent by the Security Gateways.
- B. The Management server manages, creates, stores, and distributes the security policy to Security Gateways. It also functions as the Certificate Authority of all managed Check Point products.
- C. The Management server provides the connector for the GUI client and uses exclusively port 257/tcp.
- D. The Management server only functions as the Certificate Authority of all managed Check Point products.

Correct Answer: B
