Correct Answer: D

QUESTION 2

Where are custom queries stored in R77 SmartView Tracker?

- A. On the SmartView Tracker PC local file system under the user\\'s profile.
- B. On the Security Management Server tied to the GUI client IP.
- C. On the Security Management Server tied to the Administrator User Database login name.
- D. On the SmartView Tracker PC local file system shared by all users of that local PC.

Correct Answer: C

QUESTION 3

How can you activate the SNMP daemon on a Check Point Security Management Server?

- A. B. From cpconfig, select SNMP extension.
- B. C. Any of these options will work.
- C. D. In SmartDashboard, right-click a Check Point object and select Activate SNMP.

Correct Answer: B

QUESTION 4

You have included the Cleanup Rule in your Rule Base. Where in the Rule Base should the Accept ICMP Requests implied rule have no effect?

- A. Last
- B. After Stealth Rule

C. First

D. Before Last

Correct Answer: A

QUESTION 5

Which of the following statements accurately describes the command `upgrade_export`?

A. `upgrade_export` stores network-configuration data, objects, global properties, and the database revisions prior to upgrading the Security Management Server.

B. Used primarily when upgrading the Security Management Server, `upgrade_export` stores all object databases and the `/conf` directories for importing to a newer Security Gateway version.

C. `upgrade_export` is used when upgrading the Security Gateway, and allows certain files to be included or excluded before exporting.

D. This command is no longer supported in GAI.

Correct Answer: B
