### QUESTION 1

You just installed a new Web server in the DMZ that must be reachable from the Internet. You create a manual Static NAT rule as follows:

SourceE. Any || Destination: web\_public\_IP || ServiceE. Any || Translated SourceE. original || Translated Destination: web\_private\_IP || ServiceE. Original

"web\_public\_IP? is the node object that represents the new Web server's public IP address. "web\_private\_IP? is the node object that represents the new Web site's private IP address. You enable all settings from Global Properties > NAT.

When you try to browse the Web server from the Internet you see the error "page cannot be displayed?. Which of the following is NOT a possible reason?

- A. There is no Security Policy defined that allows HTTP traffic to the protected Web server.
- B. There is no ARP table entry for the protected Web server's public IP address.
- C. There is no route defined on the Security Gateway for the public IP address to the Web server's private IP address.
- D. There is no NAT rule translating the source IP address of packets coming from the protected Web server.

Correct Answer: A

---
