Correct Answer: C

QUESTION 5

Which Check Point software blade provides visibility of users, groups and machines while also providing access control through identity-based policies?

A. Firewall

B. Identity Awareness

C. Application Control

D. URL Filtering

Correct Answer: B

Check Point Identity Awareness Software Blade provides granular visibility of users, groups and machines,

providing unmatched application and access control through the creation of accurate, identity-based

policies. Centralized management and monitoring allows for policies to be managed from a single, unified

console.
