QUESTION 1

What is the purpose of Priority Delta in VRRP?

- A. When a box up, Effective Priority = Priority + Priority Delta
- B. When an Interface is up, Effective Priority = Priority + Priority Delta
- C. When an Interface fail, Effective Priority = Priority - Priority Delta
- D. When a box fail, Effective Priority = Priority - Priority Delta

Correct Answer: C

Each instance of VRRP running on a supported interface may monitor the link state of other interfaces.

The monitored interfaces do not have to be running VRRP. If a monitored interface loses its link state, then VRRP will decrement its priority over a VRID by the specified delta value and then will send out a new VRRP HELLO packet. If the new effective priority is less than the priority a backup platform has, then the backup platform will begin to send out its own HELLO packet.

Once the master sees this packet with a priority greater than its own, then it releases the VIP.

QUESTION 2

In a Client to Server scenario, which represents that the packet has already checked against the tables and the Rule Base?

- A. Big I
- B. Little o
- C. Little i
- D. Big O

Correct Answer: D

QUESTION 3

With MTA (Mail Transfer Agent) enabled the gateways manages SMTP traffic and holds external email with potentially malicious attachments. What is required in order to enable MTA (Mail Transfer Agent) functionality in the Security Gateway?

- A. Threat Cloud Intelligence
- B. Threat Prevention Software Blade Package
- C. Endpoint Total Protection
- D. Traffic on port 25

Correct Answer: B

QUESTION 4

What is the command to check the status of the SmartEvent Server?

- A. fw ctl get int cpsemd_stat
- B. cp_conf get_stat cpsead
- C. fw ctl stat cpsead
- D. cpstat cpsead

Correct Answer: D
