#### QUESTION 1

The Threat Prevention software blade:

- A. Is configured in one unified policy for Anti-Bot and Anti-virus functions and uses the same threat repository.
- B. Can only be deployed as part of SensorNET.
- C. Is a free function that does not require additional licensing.
- D. Can only be deployed on a Security Gateway running GAiA.

Correct Answer: A

---

#### QUESTION 2

A customer does not own Check Point Gateways, but he wants to use Threat Emulation Service to detect SMTP Zero-Day vulnerabilities. What is his option?

- A. Needs to buy a Check Point security gateway.
- B. Purchase TE cloud service.
- C. Use SMTP plug-in on his exchange server.
- D. Needs to install Mail Transfer Agent on his firewall.

Correct Answer: B

---

#### QUESTION 3

SmartLog displays:

- A. Information about known threats and provides steps for remediation
- B. Events in chart format, with detailed data about threats
- C. Real time data, to help identify ongoing threats
- D. Historic data that can be used for research purposes

Correct Answer: D

---

#### QUESTION 4

When the feature \_\_\_\_\_ is ON, the Gateway does not block DNS requests that were identified as malicious. Instead it sends a false response with a bogus IP address to the client.

- A. Malware DNS Blacklist

- B. Malware DNS Trap
- C. Malware DNS Sinkhole
- D. Malware DNS Blackhole

Correct Answer: B

---

#### QUESTION 5

Can the Anti-Bot software blade be enabled on a Secure Web Gateway as well?

- A. Yes, this is an optional blade for the Secure Web Gateway.
- B. No, Anti-Bot needs to be part of the Threat Prevention Appliance.
- C. Yes, it can be enabled if IPS is enabled as well.
- D. Yes, Anti-Bot is always enabled together with Identity Awareness.

Correct Answer: A
