QUESTION 1

Consider the following diagram:

Which type of attack is occurring?

- A. Polymorphic virus-based attack
- B. Denial-of-service attack
- C. Distributed denial-of-service attack
- D. Man-in-the-middle attack using a packet sniffer

Correct Answer: C

QUESTION 2

Which of the following errors most commonly occurs when responding to a security breach?

- A. Shutting down network access using the firewall, rather than the network router
- B. Adhering to the company policy rather than determining actions based on the IT manager's input
- C. Making snap judgments based on emotions, as opposed to company policy
- D. Taking too much time to document the attack

Correct Answer: C

QUESTION 3

What is the primary drawback of using symmetric-key encryption?

- A. Key transport across a network
- B. Speed of encryption
- C. Denial-of-service attacks
- D. Inability to support convergence traffic

Correct Answer: A

QUESTION 4

You want to create a quick solution that allows you to obtain real-time login information for the administrative account on an LDAP server that you feel may become a target. Which of the following will accomplish this goal?

- A. Reinstall the LDAP service on the server so that it is updated and more secure.
- B. Install an application that creates checksums of the contents on the hard disk.
- C. Create a login script for the administrative account that records logins to a separate server.
- D. Create a dummy administrator account on the system so that a potential hacker is distracted from the real login account.

Correct Answer: C

QUESTION 5

Which of the following is a typical target of a trojan on a Linux system?

- A. Kernel modules
- B. Shared libraries
- C. Boot sector files
- D. System32 DLL files

Correct Answer: A
