QUESTION 1

Why does deploying a base image from an XVA file help manage the image release process?

A. Because it supports hypervisors supported by XenDesktop

B. Because it helps manage version control

C. Because it uses storage array features to offload host processing

D. Because it automatically deploys the latest drivers and patches

Correct Answer: B

QUESTION 2

The company\\'s security officer has stated that for compliance reasons, all internal and external network traffic must be encrypted. How should SecureICA be implemented?

A. By using NetScaler

B. By enabling SecureICA on delivery groups

C. By implementing an Active Directory group policy to configure IPsec

D. By installing an SSL certificate in the master image

Correct Answer: B

QUESTION 3

The company\\'s security officer has stated that for compliance reasons, all internal and external network traffic must be encrypted. How should IPsec be implemented?

A. By using NetScaler

B. By implementing secure delivery groups

C. By implementing an Active Directory group policy

D. By configuring a local IPsec policy in the master image

Correct Answer: C

QUESTION 4

The company is implementing XenDesktop globally for desktop virtualization.

How should the architect recommend installment of controllers for high availability?

A. Install two controllers in each datacenter.

B. Install three controllers in New York and three in London.

C. Install three controllers in Hong Kong and three in New York.

D. Install three controllers in New York and three in Oslo.

Correct Answer: A

QUESTION 5

Why does using XenConvert help manage the image release process?

A. Because it reduces image deployment time

B. Because it reduces the storage requirement for images

C. Because it simplifies the process of converting images

D. Because it provides a console to create and monitor the conversion process

Correct Answer: D
