QUESTION 1

Scenario: A company has 20 machines and 20 users. The 20 users are split into two shifts so that only 10 people are connected to the XenApp 6.5 farm at any one time. Now, a third shift of 10 new users is being added.

In order to ensure that the 10 new users can get connected to XenApp 6.5, the administrator must purchase and install 10 additional _____. (Choose the correct option to complete the sentence.)

A. client machines

B. XenApp 6.5 concurrent licenses

C. Microsoft Remote Desktop Services user client access licenses

D. Microsoft Remote Desktop Services machine client access licenses

Correct Answer: C

QUESTION 2

Scenario: A company\'s Senior Citrix Administrator requested that an administrator reconfigure the printing policies in a test XenApp 6.5 farm. The Citrix Universal Printer Driver will be used exclusively and the number of auto-created printers on the server should be kept to a minimum to conserve resources.

Which two policies should the administrator configure to meet these requirements? (Choose two.)

A. Disable the client printer redirection policy.

B. Enable the policy for the generic universal printer.

C. Enable the policy for the printing preview preference.

D. Configure the auto-create client printers policy so that client printers are NOT auto-created.

E. Configure the printer driver mapping and compatibility policy to map all drivers to the Citrix Universal Printer Driver.

Correct Answer: BD

QUESTION 3

Scenario: A server farm has five servers which are members of the FARM worker group. Multiple applications are published on the servers for use by over 100 employees. One of the applications has only 10 licenses.

What could the administrator do to allow only 10 employees to use that specific application at any given time?

A. Set the concurrent logon limit to 10.

B. Apply the limit user sessions policy using a filter.

C. Assign a load evaluator to the published application.

D. Apply the connection access control policy using a filter.

Correct Answer: C

QUESTION 4

In building out a new XenApp environment, an administrator places the Secure Gateway and Web Interface in the DMZ.

What must the administrator do to secure the traffic to the XML Broker?

A. Change the XML traffic port to a non-standard assignment.

B. Use the SSL Relay tool to encrypt traffic to the XML Broker in the farm.

C. Place the XML Broker in the DMZ and encrypt the traffic between them.

D. Use encrypted ICA to communicate between the XML Broker and the Web Interface.

Correct Answer: B

QUESTION 5

An administrator has configured session printers for a group of XenApp users, but some are complaining that the advanced printer features are NOT available when they print to a particular printer.

Which driver(s) can the administrator install to provide access to the advanced printer features?

A. Citrix Universal Driver on the XenApp servers

B. Manufacturer\\'s latest drivers on the users\\' PCs

C. Manufacturer\\'s latest OEM drivers for that printer on the XenApp servers

D. Drivers provided in the Windows drivers .CAB database on the XenApp servers

Correct Answer: C
