QUESTION 1

Scenario: A server farm consists of dual- and single-processor servers. The administrator of the farm wants to ensure that the dual-processor servers receive more sessions than the single- processor servers.

In order to distribute the session load equitably among both types of servers, the administrator must assign the _____. (Choose the correct option to complete the sentence.)

- A. default load evaluator rule to all servers
- B. advanced load evaluator rule to all servers
- C. default load evaluator rule to all dual-processor servers
- D. advanced load evaluator rule to all dual-processor servers

Correct Answer: B

QUESTION 2

Scenario: An administrator manages a XenApp 6.5 farm with one zone. All servers in the zone have identical hardware and software. The zone is configured with a primary data collector with a preference of Most Preferred and a backup data collector with a preference of Preferred. All other XenApp servers in the zone have a preference of Not Preferred.

If both the primary and backup zone data collectors are turned off, the XenApp server in the zone that will be elected the new primary zone data collector is the one _____. (Choose the correct option to complete the sentence.)

- A. with the lowest Host ID number
- B. with the highest Host ID number
- C. that responds last to the election request
- D. that responds first to the election request

Correct Answer: B

QUESTION 3

Scenario: A XenApp administrator is tasked with delivering a new application to the XenApp farm. During testing, the administrator finds that the application is incompatible with existing applications installed on the XenApp servers. He CANNOT install the application on the servers.

The administrator is in the process of publishing this application. Click the '\\Exhibit\\' button to view a screenshot of the Publish Application window.

TEST - Publish Application (3/8)

CITRIX

Type
View the application type. To change the type, use the Change application type task.

Steps

- ✓ Welcome
- Basic**
- ✓ Name
- Type**
- Location
- Servers
- Users
- Shortcut presentation
- Publish immediately

Choose the type of application to publish.

☐ Server desktop

☐ Content

☒ Application

Application type

☒ Accessed from a server

☐ Streamed if possible, otherwise accessed from a server

Server application type:

Installed application

Installed application

Streamed to server

☐ Streamed to client

Note: To change the application type after publishing it, you must use the Change Application Type task.

Quick Help
Grants users access to a single application already installed on your servers.

< Back Next > Cancel

Which streaming option should the administrator use to publish the application so that iPhone mobile device users can access the application?

- A. Streamed to client
- B. Accessed from a server- Streamed to server
- C. Accessed from a server- Installed application
- D. Streamed if possible, otherwise accessed from a server

Correct Answer: B

QUESTION 4

Scenario: A Citrix administrator manages a mixed environment consisting of desktops, XenApp and XenDesktop.

Management desires that:

login times be decreased

user profiles are stored in a centralized location

user changes be saved

user changes be made available to user sessions accessed from any desktop, XenApp server or XenDesktop connection

Based on these requirements, which type of profile should the administrator implement?

- A. Local
- B. Roaming
- C. Mandatory
- D. Citrix Profile Management

Correct Answer: D

QUESTION 5

Scenario: Users are complaining of poor audio quality from their XenApp applications. They are using version 11 of the online plug-in. XenApp audio policy has been configured using the installation defaults.

What can the administrator do to improve audio quality?

- A. Upgrade the users\' online plug-in to version 13.
- B. Set the progressive compression to one level higher than the lossy compression.
- C. Configure a XenApp bandwidth limit policy and give audio redirection a 100% allocation.
- D. Create a XenApp Computer policy and increase the Windows Media Redirection buffer size to 10 seconds.

Correct Answer: A
