QUESTION 1

Scenario: Users complain that first thing in the morning they receive errors when trying to launch their application and have to re-try many times. At other times of the day, there are NO issues.

What could be causing the morning issue?

A. A load throttling load evaluator is limiting the number of concurrent logons.

B. A scheduling load evaluator is restricting the maximum server load at this time.

C. A server load load evaluator is limiting the number of concurrent users in the farm.

D. An application user load load evaluator is limiting the maximum number of users allowed to run the application.

Correct Answer: A

QUESTION 2

Scenario: A XenApp administrator must recommend a database option for a new XenApp 6.5 data store. The new farm will have multiple zones over WAN connections with low bandwidth and high latency.

Which two database options should the administrator recommend? (Choose two.)

A. Microsoft SQL Server 2008

B. Microsoft SQL Server 2008 R2

C. Microsoft SQL Server 2008 Express

D. Microsoft SQL Server 2008 Express R2

Correct Answer: AB

QUESTION 3

For change management reasons, a XenApp administrator has been tasked with reviewing log configuration changes made to the XenApp farm.

Click the \\'Exhibit\\' button to view a screenshot of the AppCenter.

Where would the administrator access this data?

A. Farm node in the AppCenter choosing the History node

B. Farm node in the AppCenter choosing the Information tab

C. Server node in the AppCenter choosing the Information tab

D. Event Viewer in the operating system under the System node

Correct Answer: A

QUESTION 4

Scenario: All users are unable to launch applications from the Web Interface. They receive the following

error:

An error occurred while making the requested connection.

Which action should the administrator take next to troubleshoot the issue?

A. Restart the XenApp servers.

B. Restart the client machines.

C. Restart the Web Interface server.

D. Review the error logs on the web server.

E. Review the error logs on the client machines.

F. Review the error logs on the XenApp servers.

Correct Answer: D

QUESTION 5

An administrator wishes to disable the prompt given to users when Flash content is displayed in their XenApp session without impacting the performance of Flash content.

See the attached exhibit to view the prompt window.

What should the administrator do to achieve this?

A. Un-install the Flash player on the client PC.

B. Un-install the Flash player on the XenApp server.

C. Create a XenApp policy that enables Flash redirection.

D. Create a client-side group policy to always use Flash redirection.

Correct Answer: D
