-Required: Yes

-List of Values: SALES_REP_LOV

-Validate from List: No

The button has these properties set:

-Keyboard Navigable: Yes

An appropriate LOV has been created (called SALES_REP_LOV) and associated with the text item. An icon file (list.gif) exists in the appropriate directory. All other properties are left at their defaults.

You write a When-Button-Pressed trigger at the item level with this code:
