### QUESTION 1

Which two statements are true about REF CURSOR types? (Choose two.)

- A. REF CURSOR types cannot be defined inside a package.
- B. SYS\_REFCURSOR can be used to declare cursor variables in stored procedures and functions.
- C. A REF CURSOR return type can be declared using %TYPE, or %ROWTYPE, or a userdefined record.
- D. Only a weak REF CURSOR type can be used as a formal parameter of a stored procedure or function.

Correct Answer: BC

---

### QUESTION 2

Which two are major approaches that can be used to reduce the SQL injection by limiting user input? (Choose two.)

- A. Restrict users accessing specified web page.
- B. Use NUMBER data type if only positive integers are needed.
- C. Use dynamic SQL and construct it through concatenation of input values.
- D. In PL/SQL API, expose only those routines that are intended for customer use.

Correct Answer: AD

---

### QUESTION 3

Examine the structure of the EMPLOYEES table in the SCOTT schema. Name Null? Type

EMPLOYEE\_ID NOT NULL NUMBER(6)

FIRST\_NAME VARCHAR2(20)

LAST\_NAME NOT NULL VARCHAR2(25)

SALARY NOT NULL NUMBER(8,2)

COMMISSION\_PCT NUMBER(2,2)

DEPARTMENT\_ID NUMBER(4)

View the Exhibit and examine the code for the EMP\_TOTSAL procedure created by user SCOTT.

Which statement is true regarding the EMP\_TOTSAL procedure?

```
CREATE OR REPLACE PROCEDURE emp_tot_sal  
(p_emp_id NUMBER)  
IS  
V total NUMBER := 0;  
BEGIN  
  SELECT salary+(salary*NVL(commission_pct,0)) INTO v_total  
  FROM employees  
  WHERE employee_id=p_emp_id;  
  IF SQL%NOTFOUND THEN  
    DBMS_OUTPUT.PUT_LINE('Employee does not exist');  
  ELSE  
    DBMS_OUTPUT.PUT_LINE('Total salary for employee ' ||  
      p_emp_id || ' is ' || v_total);  
  END IF;  
END;  
/
```

- A. It is created successfully, but displays the correct output message only for existent employee IDs.
- B. It is created successfully and displays the correct output message for both existent and nonexistent employee IDs.
- C. It generates an error because the %NOTFOUND attribute cannot be used in combination with a SELECT INTO statement.
- D. It generates an error because a user-defined exception has to be included whenever the % NOTFOUND attribute is used in combination with a SELECT INTO statement.

Correct Answer: A

#### QUESTION 4

You have an external C procedure stored in a dynamic-link library (DLL).

The C procedure takes an integer as argument and returns an integer. You want to invoke the C procedure through a PL/SQL program.

View the Exhibit.

```
SQL> conn / as sysdba
Connected.
SQL> CREATE OR REPLACE LIBRARY C_Code
AS 'D:\app\Administrator\product\11.1.0\db_1\BIN\calc_tax.dll';

Library created.

SQL> grant execute on C_code to oe;

Grant succeeded.

SQL> conn oe/oe
Connected.

SQL> set serveroutput on

SQL> CREATE OR REPLACE PROCEDURE C_output
2 (p_in IN BINARY_INTEGER)
3 IS
4 i BINARY_INTEGER;
5 BEGIN
6 i := calc_tax(p_in);
7 END C_output;
8 /
```

Which statement is true about the C\_OUTPUT PL/SQL program?

- A. It invokes the external C procedure.
- B. It only publishes the external C procedure.
- C. It fails because the external C procedure is not published.
- D. It fails because the input data type is BINARY\_INTEGER and the external C procedure expects an integer.

Correct Answer: C

#### QUESTION 5

You created a PL/SQL subprogram that successfully invokes an external C procedure. After a while, the database administrator (DBA) drops the alias library schema object. The shared library exists in the system. Which statement is true in this scenario?

- A. The corresponding shared library is also removed from the system.
- B. PL/SQL subprograms can be used to invoke the external C procedure.
- C. The existing extproc process is terminated and a new extproc is started.
- D. The PL/SQL subprogram that depends on the external C program becomes invalid.

Correct Answer: D
