### QUESTION 1

Your customer decided to use min-max planning for some items in specific subinventories. You caution him to not include too many customer orders when he runs the report. What do you suggest he use?

- A. ASCP (Advanced Supply Chain Planning)
- B. Supply Cutoff Date
- C. MRP (Material Requirement Planning)
- D. Demand Cutoff Date
- E. Supply and Demand Cutoff Dates

Correct Answer: D

---

### QUESTION 2

A Finished Goods subinventory of name FG has to be set up in several inventory organizations. Which two are true? (Choose two.)

- A. The same subinventory name FG can be set up in any of the inventory organizations under the same Oracle Inventory responsibility.
- B. The same subinventory name FG can be set up in different inventory organizations, regardless of the Oracle Inventory responsibilities.
- C. The same subinventory name FG CANNOT be set up in several inventory organizations under the same Oracle Inventory responsibility.
- D. The same subinventory name FG can be set up in different inventory organizations IF the organizations are under different Oracle Inventory responsibilities.

Correct Answer: AB

---

### QUESTION 3

A customer produces stents at several factories that are set up as inventory organizations. The company needs the ability to uniquely identify each stent and know which factory produced it. Regulations require that each stent be identified by 16-characters. What would you do to meet this requirement?

- A. Use lot control, by using the prefix for the factory, and total length of 15 characters. Set Uniqueness to None.
- B. Set up serial control, by using the prefix for the factory, and a starting serial number of 16 characters. Set Uniqueness to Across Organizations.
- C. Set up serial control, by using the prefix for the factory, and a starting serial number of 15 characters. Set Uniqueness to Across Organizations.
- D. Use lot control, by using the prefix for the factory, and total length of 16 characters. Set Uniqueness to None.

Correct Answer: C

---

#### QUESTION 4

If an internal order is not required for the transfer between two organizations, then an interorganizational transfer of material (either direct or intransit type) between the inventory organizations applies to:

1. the transfer of material between inventory organizations across operating units
2. the transfer of material between inventory organizations within the same operating unit

- A. both 1 and 2
- B. 2 only
- C. 1 only

Correct Answer: A

---

#### QUESTION 5

There are three possible methods to define an "Inventory item". Each method requires some minimum information about the item. Which three options correspond to the three methods, and list the minimum information required to define an "Inventory item" for an average costing inventory organization? (Choose three.)

- A. Item, Item Description, Item template, Item Category, Long Description, Item DFF (descriptive flexfield)
- B. Item, Item Description and Functional usage of the item for setting the attribute control
- C. Item, Item Description, Seeded "Finished Goods" Item template
- D. Item, Item Description, Copy existing Inventory item
- E. Item, Item Description, Item template, Item Cost
- F. Item, Item Description

Correct Answer: BCD
