Correct Answer: B

QUESTION 4

Which two statements are true regarding item standard costs, if the inventory organizations are setup to use their own organization as the costing organization? (Choose two.)

- A. An item can have different standard costs across different inventory organizations of a single operating unit.
- B. An item can have different standard costs across different inventory organizations regardless of the operating unit.
- C. An item can have different standard costs in different inventory organizations only if the organizations are under different operating units.
- D. An item cannot have different standard costs across different inventory organizations of a single operating unit.

Correct Answer: AB

QUESTION 5

Which three statements are true about defining an item using a template? (Assume that there are no Interdependent Attributes.) (Choose three.)

- A. You can apply multiple templates to an item.
- B. A template applied to a master item, which has already been assigned to a child organization, can still update the organization-controlled item.
- C. Template application is exclusive. If you apply a second template to an item, the item will not retain any values of the prior template.
- D. A template can be applied only at the master organization level.
- E. A template can be applied at the master or child organization levels.
- F. Modifying an item template will automatically update the items that were previously defined using that template.
- G. Template application is additive. If you apply a second template to an item, the item will retain the values of all the attributes that were not enabled by the second template.

Correct Answer: AEG
