QUESTION 1

Which two statements are true if you choose the "Recreate grants and synonyms for APPS schema" task option from the adadmin utility? (Choose two.)

- A. This option re-creates grants on some packages from APPS to SYSTEM.
- B. This option re-creates grants and synonyms for the APPLSYSPUB schema.
- C. This option re-creates grants and synonyms for the code objects of the APPS schema to the base product schemas.
- D. This option spawns parallel workers to re-create grants and synonyms linking sequences and tables in the base product schemas to the APPS schema.

Correct Answer: BD

QUESTION 2

You discover that you will be applying an application patch on your APPL_TOP by using AutoPatch, which contains a compatible feature, the prereq line. To ensure that the automatic, prerequisite patch-checking feature operates during the application of the patch, you must run AD Administration, Maintain Snapshot Information, then perform some key tasks, and then AutoPatch. Select four key Maintain Snapshot Information tasks or combination of tasks that will ensure that the prerequisite patch-checking feature operates during the application of the patch. (Choose four.)

- A. Update a current view snapshot, or create a named snapshot.
- B. Export a snapshot to a file, and then delete the named snapshot.
- C. Import an up-to-date snapshot from a file from a different APPL_TOP.
- D. List snapshots, delete the named snapshot, and create a named snapshot.
- E. Copy the existing snapshot, delete the named snapshot, and then create a named snapshot.

Correct Answer: ACDE

QUESTION 3

You want to run preclone on database tier. You logged in to the database node and realized that the appsutil directory is missing. Identify the command you use to re-create appsutil.zip, so that the appsutil directory can be re-created.

- A. perl /bin/admkdbutil.pl
- B. perl /bin/admkappsutil.pl
- C. perl /appl/bin/admkappsutil.pl
- D. perl /appl/bin/admkappsutil.pl

Correct Answer: B

QUESTION 4

As the Applications DBA, you are tasked to apply a patch and use the adpatch utility in the command line. Only the database driver should be applied. Choose the correct adpatch command-line syntax.

- A. adpatch options=applydatabaseportion
- B. adpatch option=nocopyportion, nogenerateportion
- C. adpatch OPTIONS=NOCOPYPORTION,NOGENERATEPORTION
- D. adpatch options=nocopyportion,nogenerateportion
- E. adpatch option=nodatabaseportion,nocopyportion,nogenerateportion

Correct Answer: D

QUESTION 5

The Oracle Applications Release 12 processes on the application tier are started successfully. The Applications database administrator (DBA) must apply a patch while the users are still using Oracle Applications. According to the instructions from readme.txt of the patch to be applied, only the concurrent manager process must be shut down before applying the patch. After the patch is applied successfully, one should start the concurrent manager processes. The Applications DBA performs these steps to apply the patch on the application tier:

Step 1: Logs in to the application tier as "applmgr" Step 2: Changes to the \$INST_TOP/admin/scripts directory Step 3: Executes the adstpall.sh script Step 4: Applies the patch Step 5: Checks the log file of the patch for any errors Step 6: Runs the \$INST_TOP/admin/scripts/ adstrtal.sh script

What do you conclude?

- A. There are no mistakes in the steps.
- B. In the sixth step, the location of the script is wrong.
- C. In the third step, the adstpall.sh script should not be used.
- D. In the first step, the user should be oracle instead of applmgr.

Correct Answer: C
