QUESTION 1

View the Exhibit.

You attempt to access a component through a content reference and the shown error appears.

Select the most appropriate course of action to identify the error.

A. Edit the content reference security settings in the portal registry.

B. Examine the portal registry for content reference security authorizations.

C. Examine the permission list, role, and user profile to verify correct security authorizations.

D. Examine the component properties to verify that you have appropriate internet security authorization.

Correct Answer: C

QUESTION 2

To use the PeopleCode Debugger, you open a program in the PeopleCode Editor, set a breakpoint, and then access the point in the application at which the PeopleCode program runs. The Debugger synchronizes correctly with the application only if _____.

A. the application server and Application Designer are on the same machine

B. Application Designer is connected to the application database in a two-tier mode

C. Application Designer and the database are both in the same application server domain

D. Application Designer is connected to the application database in a three-tier mode, using the application server

Correct Answer: D

QUESTION 3

Select the two true statements about PeopleSoft Pure Internet Architecture. (Choose two.)

A. Metadata is cached on the application server.

B. Most code is executed on the application server.

C. By placing the Application Designer executables on the Web server, you can take advantage of PeopleSoft Pure Internet Architecture to develop applications in the browser interface.

D. The Web server generates the HTML and transfers it to the application server, which then retrieves the application data and sends all information directly to the browser for display to the user.

Correct Answer: AB
