QUESTION 1

What are three console personalization features that are available to users in Oracle Enterprise manager Cloud Control?

- A. Users can add items to the menu on a page.
- B. Users can customize the layout of the regions on a page.
- C. Users can add or remove a region from a page.
- D. Users can select from a set of predefined home pages.
- E. Users can specify the tables displayed within each region.

Correct Answer: BCE

User Region You can:

*

(B) Customize the layout of regions on a page

*

(C) Add a region to or remove a region from a page

*

Specify the data displayed within each region

*

Select the view that best meets your needs from a set of predefined home page layouts

QUESTION 2

Which three statements are true for Oracle Enterprise Manager snapshots and baselines?

- A. Oracle Enterprise Manager is the interface managing baseline and baseline templates.
- B. Oracle Enterprise Manager is the interface managing snapshots and snapshot templates.
- C. Oracle Enterprise Manager can view but no edit the threshold settings for baseline metrics.
- D. Oracle Enterprise Manager, by default, deletes baselines on a rolling seven-day interval.
- E. You can specify and preserve a pair or a range of snapshot as a baseline with Oracle Enterprise Manager.
- F. You can specify and preserve a pair or a range of baseline as a snapshot with Oracle Enterprise Manager.

Correct Answer: ACE

A: You can also create baselines for a contiguous time period in the future using baseline templates. There are two types of baseline templates: single and repeating.

E: (not F): A baseline is a pair of snapshots that represents a specific period of usage (not F). Once baselines are defined they can be used to compare current performance against similar periods in the past.

QUESTION 3

Which agent configuration would you use for a single host that is running an Oracle 10g Database, an Oracle 11g Database, and an Oracle WebLogic Server?

- A. One agent for the database and one agent for the WebLogic Server
- B. One agent for all three
- C. One agent for each
- D. No agents required with SSL

Correct Answer: B

QUESTION 4

Which three virtualization technologies can be managed by Oracle Enterprise Manager Ops Center?

- A. Oracle Solaris Containers
- B. Oracle Virtual Desktop Infrastructure
- C. Oracle VM Server for SPARC
- D. Oracle VM Server for X86
- E. Oracle VM VirtualBox

Correct Answer: ACD

Oracle Enterprise Manager Ops Center 12c manages the lifecycle of Oracle Solaris Containers and Oracle VM Server for both X86 and SPARC.

A: * Oracle Enterprise Manager Ops Center

12c displays Oracle Solaris Containers and Oracle VM for SPARC and x86 virtual machines in a concise manner helping to identify the over subscription of resources.

C: Using Oracle Enterprise Manager Ops Center, you can provision Oracle VM Server for SPARC.

D: The integration of Oracle VM Server for x86 with Oracle Enterprise Manager Ops Center provides the capability to manage Oracle VM Servers and Oracle VM Manager through Oracle Enterprise Manager Ops Center UI.

QUESTION 5

Which three activities can be performed with the Oracle Enterprise manager Groups functionality?

- A. Monitor outstanding alerts and policy violations as a group.
- B. Perform administrative tasks on a group.
- C. Monitor the overall performance of a group and view the performance summary of targets within the group.
- D. Monitor a group of LUNs used by a database for storage.
- E. Perform administration on a user group.

Correct Answer: BCE

C: An Administration Group is a special type of group designed to automatically deploy management settings (monitoring templates, compliance standards, cloud policies) to targets when they join the group. Administration Groups are created by defining their membership criteria based on target properties.

Note:

* The group home page continues to provide an overview of the status and health of members of the group and a central way to launch operations on the groups, such as submit jobs, start blackouts, and so forth.
