QUESTION 1

You expand a business rule component that a colleague added to the BPEL process. You see an Assign element named Facts_To_Rule_Service.

Which statement is true about this Assign element?

- A. It was added automatically based on entries that your colleague made in the dialog box that appeared when the business rule component was added to the BPEL model.
- B. Your colleague manually added this Assign element after adding the business rule component to the BPEL Model.
- C. This Assign element was automatically added when your colleague manually added the corresponding Rule_Service_To_Facts assign to the BPEL model.
- D. You can delete this Assign because it was created for documentation purposes only.

Correct Answer: A

Note:

* Facts_To_Rule_Service : Assigns the facts to a variable.

QUESTION 2

By using the System Component Architecture (SCA) test framework, you can create tests for which three items?

- A. Reference binding components
- B. Service components like a Mediator
- C. Wires
- D. Invoke activities in a BPL process
- E. Composite sensors

Correct Answer: ABC

The test framework supports testing at the SOA composite application level. In this type of testing, wires (C), service binding components, service components (such as BPEL processes and Oracle Mediator service components) (B), and reference binding components (A) are tested.

QUESTION 3

What does SOA governance complement and influence?

- A. Data center capacity planning
- B. Decisions to use SOAP-based vs. REST-based web services approaches.

- C. Data models that define a shared view of corporate data resources.
- D. IT governance processes and structures

Correct Answer: D

Service-oriented architecture (SOA) has moved beyond hype to widespread acceptance as an IT strategy for delivering business results. Effective SOA governance is essential to achieving measurable, sustainable business value, lowering costs, improving efficiency and increasing visibility. In fact, without it, many SOA initiatives fail. Oracle provides a comprehensive SOA governance solution that unites people, process, and technology to help organizations achieve their SOA objectives at every level of SOA maturity. While early SOA projects may need automation to manage artifacts in the lifecycle, more advanced organizations measure SOA success by how it transforms the business. Governance support is essential to making progress on both technical and business dimensions of SOA.

QUESTION 4

What is default transactional behavior for a synchronous request/reply and a one-way synchronous BPEL process?

- A. Required
- B. RequireNew
- C. Mandatory
- D. NotSupported
- E. Supports

Correct Answer: B

The default transaction for a synchronous process is requiresNew. That was until version 11.1.1.6. On this last version, you are asking to enter a Transaction parameter when creating a new synchronous bpm process.

QUESTION 5

A customer demands access to your Service Composite Architecture (SCA) application.

However keeping with the customer's company standards, the interface must be EJB 3.0.

Which solution meets the needs of the customer while requiring the least amount of time, effort, and architectural change for you?

- A. Create a small EJB 3.0 application that interfaces directly with your SCA application. This approach hides the web service interface from your customer while adding the smallest amount of overhead in the process
- B. Create an EJB 3.0 interface using Oracle Service Bus, which, in turn, invokes the SCA application through its native web service interface. This approach hides the web service Interface from your customer while adding the smallest amount of overhead in the process.
- C. Use the Mediator component to provide an EJB 3.0 interface in addition to the existing web service interface. This approach adds the least amount of overhead to each call.
- D. Explain to the customer the importance and flexibility of modern web services, and encourage the customer to learn

some new skills.

Correct Answer: B
