QUESTION 1

You\\'ve made the following category assignments to your catalogs.

Which categories will be displayed if a call is made on allRootCategories on catalog B?

Catalog A:

rootCategories = category1, category2

Catalog B:

rootCategories = category3, category4

rootSubCatalogs = CatalogA

- A. category1, category2, category3, category4
- B. category3, category4 only
- C. category3, category4 are included, category1 and category2 may be included based on configuration of catalog B.
- D. category3, category4 are included, category1 and category2 may be included based on configuration of Catalog A.

Correct Answer: A

allRootCategories lists of all the root categories in the catalog, including the allRootCategories in the rootSubCatalogs. This is used for display purposes.

Note: Displaying Root Categories

Typically, a catalog home page displays a list of root categories. Unlike other categories, root categories cannot be found through the childCategories property of other categories. Root categories are those that appear in the allRootCategories property of the user\\'s catalog.

QUESTION 2

In order to ensure versioning integrity, a deploying project obtains exclusive locks on its assets when deployment starts. What is the effect of these locks?

- A. Until a project\\'s asset locks are released, other projects that share those assets cannot add the asset to the project.
- B. Until a project\\'s asset locks are released, other projects that share those assets cannot be in author mode and are shown as locked in the BCC UI.
- C. Until a project\\'s asset locks are released, other projects that share those Assets cannot deploy.
- D. It is a database lock and has no effect on the UI. Other projects will not get a concurrent update exception if a database save is issued for the shared assets.

Correct Answer: C

In order to ensure versioning integrity, a deploying project obtains exclusive locks on its assets when deployment starts.

It releases those locks only after deployment is complete and project assets are checked in, or when the deployment is reverted. Until a project's asset locks are released, other projects that share those assets cannot deploy.

QUESTION 3

What is the state of a newly created order?

- A. CREATED
- B. INCOMPLETE
- C. PROCESSING
- D. NO_PENDING_ACTION

Correct Answer: B

ATG Commerce provides the following configured instances of the state classes, which are located in us at /atg/commerce/states/:

OrderStates: indicates the states of an Order.

For the display names of states:

ORDER.INCOMPLETE=INCOMPLETE ORDER.SUBMITTED=SUBMITTED

For the descriptions of states: ORDERDESC.INCOMPLETE=The order is incomplete ORDERDESC.SUBMITTED=The order has been submitted to Fulfillment

QUESTION 4

In the item descriptor provided, what is the column book_index used for?
