A. includesAll

B. elementAt

C. indexOf

D. starts with

E. ignorecase

Correct Answer: ABC

The SQL repository does not support queries of the following types:

includesAll elementAt indexOf

QUESTION 4

In order to ensure versioning integrity, a deploying project obtains exclusive locks on its assets when deployment starts. What is the effect of these locks?

A. Until a project\\'s asset looks are released, other projects that share those assets cannot add the asset to the project.

B. Until a project\\'s asset locks are released, other projects that share those assets cannot he in author mode and are shown as locked in the BCC UI.

C. Until a project\\'s asset locks are released, other projects that share those Assets cannot deploy.

D. It is a database lock and has no effect on the UI. Other projects will net a concurrent update exception it a database save is issued for the shared assets.

Correct Answer: C

In order to ensure versioning integrity, a deploying project obtains exclusive locks on its assets when deployment starts. It releases those locks only after deployment is complete and project assets are checked in, or when the deployment is reverted. Until a project\\'s asset locks are released, other projects that share those assets cannot deploy.

QUESTION 5

What is the result if addItem on the repository is never called after createItem call?

A. The item is not persisted in database.

B. It is saved automatically when transaction commits.

C. The item is saved when the server shuts down.

D. It is illegal and an exception is thrown.

Correct Answer: A

CreateItem returns a new item populated with the supplied id. The new item is not added to the repository; addItem must be called in order to change the repository.
