QUESTION 1

Identify the four different levels where transaction controls are defined.

- A. Expenditure Categories
- B. Expenditure Organization
- C. Employee
- D. Project Organization
- E. Expenditure Type
- F. Person Type

Correct Answer: ACDE

You can configure transaction controls by the following:

(A)Expenditure Category (C)Employee (E)Expenditure Type Non-Labor Resource

QUESTION 2

A company has different organization requirements for HR, Payroll, Finance, and Projects. How can the company achieve this?

- A. By configuring a shared organization hierarchy
- B. By configuring separate organization hierarchies for each application
- C. By configuring a shared organization hierarchy for Projects and Payroll
- D. By configuring a shared organization hierarchy for Finance and Payroll

Correct Answer: C

Note:

*Organization hierarchies provide a structure for the relationships between the organizations within your enterprise. They enable you to manage expenditure and reporting data and coordinate project-owning organizations. If your organization

uses business groups, you can create project burdening organization hierarchies for each business group.

You define an organization hierarchy by telling Oracle Projects which organizations are subordinate to which other organizations. You can define one organization hierarchy or several, depending on the needs of your enterprise.

*The organizations and organization hierarchies of an enterprise are closely interrelated with the policies and procedures of that enterprise. To configure Oracle Projects to meet your business requirements, you must make critical implementation decisions regarding how you set up your organizations in Oracle Projects.

Organizations are departments, sections, divisions, companies, or other organizational units in your enterprise. You can gather collections of organizations into organization hierarchies. Organization hierarchies make it easier to manage expenditure and reporting data and coordinate the project-owning organizations within your enterprise.

QUESTION 3

Your customer has set up a contract project with a distribution rule Work/Work. Identify three setup options to:

- A. Setup revenue categories as required.
- B. Define revenue accounts at the revenue category setup level.
- C. Define AutoAccounting rules to derive revenue account based on revenue category.
- D. Define grouping option by revenue category on the invoice format and attach the invoice format at the project type level.
- E. Define grouping option by revenue category on the project type.

Correct Answer: ACD

Note:

Revenue and Billing Information

When you enter revenue information for your project, you specify a revenue distribution rule for the revenue accrual method and the billing method for this project. When you enter billing information, you specify invoice formats, bill cycle days,

and other invoicing information. The project type determines which revenue distribution rule appears as the default value for this field, and which other revenue distribution rules you can choose from. Oracle Projects predefines the following

revenue distribution rules:

Cost/CostAccrue revenue and bill using the ratio of actual cost to budgeted cost (percent spent). Cost/EventAccrue revenue using the ratio of actual cost to budgeted cost (percent spent), and bill based on events.

Cost/WorkAccrue revenue using the ratio of actual cost to budgeted cost (percent spent), and bill as work occurs.

Event/EventAccrue revenue and bill based on events.

Event/WorkAccrue revenue based on events, and bill as work occurs. Work/EventAccrue revenue as work occurs, and bill based on events.

Work/WorkAccrue revenue and bill as work occurs.

QUESTION 4

Your client has expressed a desire to produce and summarize invoice lines for Non-Labor transactions by type of expenditure based on high level tasks of the project. Which invoice format grouping should he used to achieve this?

- A. TopTask,ExpenditureType
- B. TopTask,Employee
- C. Revenue Category,Expenditure Category, Top Task
- D. TopTask,Expenditure Category
- E. TopTask, Revenue Category, Expenditure Category,Expenditure Type

Correct Answer: A

Note: *Oracle Projects processes tasks based on their position in the structure. The three distinct positions are: Top Task: A task whose parent is the project Mid Task: A task that is not a top task or a lowest task Lowest Task: A task that is at the bottom of the structure, without any child tasks

*You can configure transaction controls by the following: Expenditure Category Employee Expenditure Type Non-Labor Resource

QUESTION 5

Which three types of People Resources does Oracle Projects support?

- A. Team Roles
- B. Straight Time
- C. Jobs
- D. Item
- E. Named Person

Correct Answer: ACE

Note:

*People resources represent named persons or any grouping of named persons(E)by attributes such as job(C), organization, or role(A), whose time (effort) capacity is consumed to complete the project work. Example: Amy Marlin
