### QUESTION 1

Which statement is true?

- A. SIL stands for Source Independent Load and is used to move the data from staging tables to Data Warehouse.
- B. SIL stands for Source Independent Load and is used to move the data from source to staging tables of Data Warehouse.
- C. SIL stands for Source Intensive Load and is used to move the data from staging tables to Data Warehouse.
- D. SIL stands for Source Intensive Load and is used to move the data from source to staging tables of Data Warehouse.

Correct Answer: A

---

### QUESTION 2

Which two statements about a micro-ETL are true?

- A. They usually handle small subject areas or subsets of larger subject areas.
- B. Before a micro-ETL execution plan runs, the DAC Populates refresh date values in the Refresh Dates child tab of the Execution Plans tab.
- C. They are ETL processes that you schedule at very frequent intervals, such as hourly or half-hourly
- D. There can be no common subject areas between normal ETL and micro-ETL execution plans.

Correct Answer: AC

---

### QUESTION 3

Your organization plans to deploy BI Applications for the first time. In order to make sure that the approximately 300 users are enabled to work in a smooth and performing way what would you consider?

- A. Use at least one environment for development and testing and one for production. In each environment install the Oracle BI Server, DAC and Informatica PowerCenter on the same machine. Install the Oracle BI Presentation server on a second machine. Only enable caching in the development environment. Enable automatic purging and seeding of the cache. Enable object security.
- B. Use one environment and install the Oracle BI Server, DAC and Informatica on the same machine and install the Oracle BI Presentation server on a different machine. Enable automatic purging and seeding of the cache.
- C. Use at least one environment for development and testing and one for production. In each environment install the Oracle BI Server, DAC and Informatica PowerCenter on the same machine. Install the Oracle BI Presentation server on a second machine. Keep the data warehouse separated from the OLTP database. Only enable caching in the production environment. Enable automatic purging and seeding of the cache. Enable object and data security.
- D. Use at least one environment for development and testing and one for production. Enable object and data security per user, enable logging and disable caching.

E. Use at least one environment for development and testing and one for production. Install DAC and Presentation server on one machine and install Informatica PowerCenter and Oracle BI Server on one machine. Install the data warehouse in the OLTP database on a third machine.

F. Use at least one environment for development and testing and one for production. Install DAC and Presentation server on one machine and install Informatica PowerCenter and Oracle BI Server on one machine. Install the data warehouse in the OLTP database on the Oracle BI Server machine.

Correct Answer: C

---

#### QUESTION 4

Which two are mandatory pre-installation tasks for Informatica Power Center Client installation?

- A. Pre-installation of Informatica Server
- B. Creation of Informatica repository
- C. Creation of ODBC Database Connections
- D. Pre-installation of Data Warehouse Administration console
- E. Pre-installation of Oracle Business Intelligence Enterprise Edition

Correct Answer: CE

---

#### QUESTION 5
