http://docs.oracle.com/cd/E12839_01/web.1111/b31974/reusing_components.htm#BEI JIGDG(Table 32-1)

QUESTION 4

In a JSF view, the user completes a form and clicks a Submit button. The Submit button should call the commit operation on the application module, as well as the loginsert method defined in the-ationModuleimpl .Java. Finally, the Submit button should navigate to the rowinserted navigation case in the task flow. How would this functionality be accomplished?
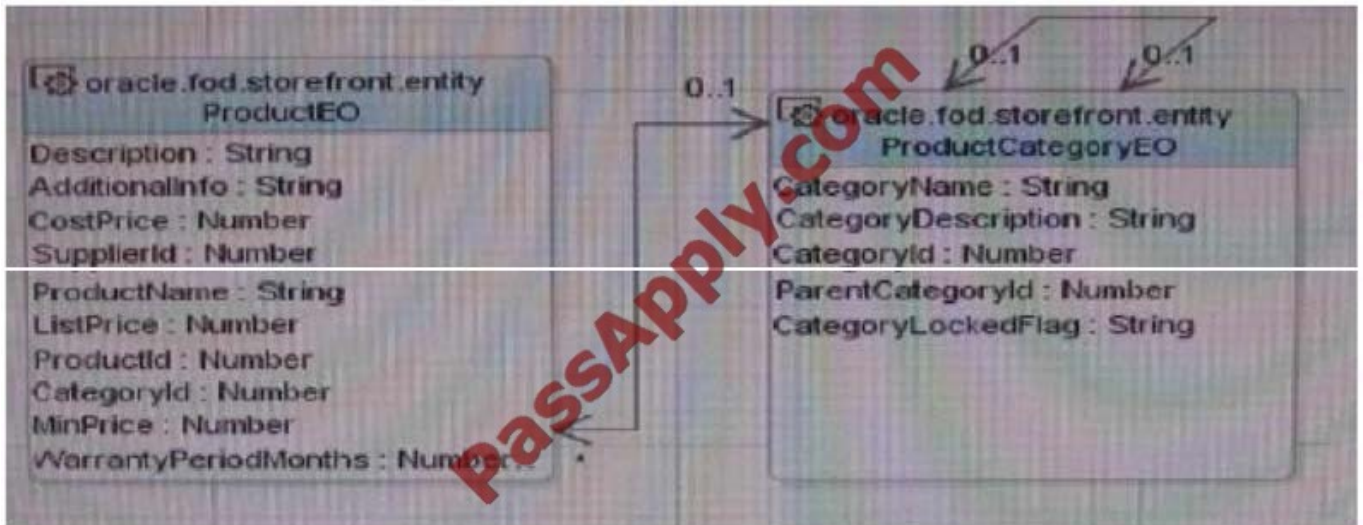

A. Bind the button\\\'s Action property to a backing bean that contains accessors for the button. In the getter for the button, return "rowinserted"

B. Bind the button\\\'s Action property to a managed bean that calls the Commit operation and loginsert methods, and create a managed property with a value set to "rowinserted"

C. Bind the button\\\'s Action Listener property to # {bindings. Comnit. execute}, define a session- scoped managed bean that calls the loginsert method, and modify the loginsert method to return a String value of "rowinsertec

D. Bind the button\\\'s Action property to # {bindings. loginsert. execute} and define a session- scoped managed bean that calls the Commit operation and returns "rowinserted"

E. Bind the button\\\'s Action property to a managed bean that calls the Commit operation and loginsert methods via OperationBinding, and return "rowinserted"

F. Bind the button\\\'s Action Listener property to # {bindings. Commit. execute} andand # {bindings, loginsert. execute) and set the Action property to "rowInserted # {bindings.Commit.execute}

Correct Answer: A

QUESTION 5

The FOD schema includes two entity objects, ProductEO and ProductCategoryEO, related as shown in the screenshot. Examine the recursive relationship that ProducCategoryEO has with itself and choose the business rule that this relationship implements.

A. A Product Category belongs to one or many (parent) Product Categories and a Product Category contains one or many (child) Product Categories.

B. A Product Category may belong to a (parent) Product Category and may contain a (child) Product Category.

C. A Product Category belongs to one and only one (parent) Product Category and contains at lea one (child) Product Category.

D. A Product Category belongs to one or many (parent) Product Categories and may contain Product Categories.

E. A Product Category must belong to at least one (parent) Product Category and must contain and only one (child) Product Category.

Correct Answer: D
