QUESTION 3

Identify two characteristics of an unbounded task flow.

- A. It cannot be called from another task flow.
- B. It may have multiple entry points.

- C. It has a well-defined boundary.
- D. It can be used as a region on a page.
- E. It can accept parameters and can return values.

Correct Answer: AB

Reference: http://docs.oracle.com/cd/E12839_01/web.1111/b31974/taskflows.htm

QUESTION 4

Your application contains a bounded task flow with four pages. The pages are all based on different application modules and the task flow has the transaction property set to "Always Begin New Transaction and a commit operation is defined as the return activity. The user makes some changes on each of the pages but a commit failure occurs on the bindings in the third page. Which of these scenarios describes the outcome of this situation?

- A. None of the changes on any of the pages is committed all are rolled back.
- B. Pages one and two and four are committed; page three is not committed.
- C. The changes on the first two pages are committed; the changes on the last two pages are not committed.
- D. It depends on the value that has been set in the Transaction property on each application module.

Correct Answer: C

QUESTION 5

You have a page that shows order items, and the product ordered. When you add a product to the ordered item list, you select it from a category. You select a category and then select the product to order from the category. You can accomplish this task with a dependent list of values. In order to accomplish this task you need to create a view criteria on the product\\'s view. Which attribute from the Product\\'s view should you use in the view criteria?

- A. OrderItemId
- B. ProductId
- C. ProductName
- D. CategoryId
- E. CategoryName

Correct Answer: B
