### QUESTION 1

Where are workflows accessed?

- A. In portfolios
- B. In the EPS
- C. In the dashboards
- D. In the workspace

Correct Answer: C

Explanation:

The Workflow portlet is displayed in a Dashboard.

Example:

- 1) Setup and Configuration: After your administrator sets up BPM, configure a dashboard to display the Workflows portlet.
- 2) Action Required Tab: This tab shows the tasks that are important to you (the currently logged in user).
- 3) My Workflows Tab: This tab enables you to view all workflows according to role and status filters you can set.
- 4) Initiate a Workflow: Click Initiate a Workflow to start a new instance of a workflow based on a predesigned template.

Note:

When a specific user or any user assigned to a role or group logs into P6, the Workflows portlet on their dashboard will display their relevant tasks at this stage of

the workflow, as authenticated by BPM.

### QUESTION 2

Your customer wants to take advantage of capacity planning in portfolios. The customer would like to use generic resources, because they have greater flexibility to respond to changing costs by resource by location. In fact, they would prefer not to set up any roles at all in the database, because they perceive generic resources and roles to be duplicate effort. What would an appropriate response be to this customer?

- A. Use generic resources in Capacity Planning view, because they have greater ability to respond to changing costs.
- B. User generic resources for project financials, and mirrored roles for capacity planning.
- C. Use roles for planning and project financials to eliminate duplicate data maintenance.
- D. Integrate with HR systems to obtain automated generic resource pricing updates.

Correct Answer: B

Explanation:

---

### QUESTION 3

Your customer's project teams are cross-functional and global. Therefore, any standard reports must be generated at a standing day/time so that all affected resources and users have clearly defined timelines for data quality checks prior to report creation. Identify the P6 R8 feature that will address this requirement.

- A. Email monthly report to distribution list
- B. Send reports directly to printers at all user locations
- C. Schedule report generation to minimize performance issues
- D. Post generated reports to content repository

Correct Answer: C

Explanation:

Reports can be run on the spot or scheduled.

Note: Reports may be set to run on a schedule. This is very handy if you need a set of reports all generated at the same time. For example, you may need reports

showing data as of the 25th of the month available for a review meeting the following day. You can schedule a set of reports to run at 11:59 pm on the 25th. They

can then be automatically e-mailed to all meeting participants. In this sense, scheduled reports are similar to the batch reports of P6 Professional, but with the

added bonus that you can schedule the delivery.

### QUESTION 4

By default, a role's limit is determined by\_\_\_\_\_.

- A. the manually entered value on the Limit tab in the Role Dictionary
- B. the combined limit of all resources assigned to the role
- C. the combined limit of all primary resources assigned to the role
- D. the combined limit of all primary resources assigned to a project

Correct Answer: A

Explanation:

By default, role limits are calculated based on the limit defined for each role's primary resource, which may not accurately reflect a role's planned allocation.

Reference; Oracle Primavera P6 Project Management, Reference Manual, Define role limits

### QUESTION 5

Identify one filter enhancement in P6 R8.

- A. Apply multiple filters simultaneously
- B. Create filters with no more than three criteria
- C. Cut, Copy, and paste filters
- D. Assign filters to unique, single activity views

Correct Answer: D

Explanation:

New in Release 8.2 include:

\* Is Under filter: This is a new property used in filtering data which lets you filter by location of an item within a hierarchy. For example, you can filter for activities only under a certain WBS (Work Breakdown Structure) node.
