QUESTION 1

You are creating an Oracle Cluster database using DBCA. The "Memory size (SGA and PGA)" field is supplied on value of 2000 MB. The default Block used for the database is _____.

- A. 2 KB
- B. 4 KB
- C. 8 KB
- D. 16 KB
- E. 32 KB

Correct Answer: C

Note:

* In the Block Size list, enter the size in bytes or accept the default. Oracle Database data is stored in these blocks. One data block corresponds to a specific number of bytes of physical space on disk. While using pre-defined templates, this field is not enabled since the database will be created with the default block size of 8 KB. But while using the custom option, you can change block size. Selecting a block size other than the default 8 KB value requires advanced knowledge and should only be done when absolutely required.

QUESTION 2

In the end of the database creation process using DBCA which two options can you choose from?

- A. Create database
- B. Generate database creation scripts
- C. Initialize the database instance
- D. Configure the database initialization parameters such as memory target, character set, etc.

Correct Answer: AC

Database Creation Options

Check any of the following options for creating the database:

*

Create Database--Check to create your database at this time.

*

Save as a Database Template--Check to save the database definition as a template to use at another time.

*

Generate Database Creation Scripts--Check to generate a SQL database creation script that you can run at a later time. Reference: Creating a Database with DBCA

QUESTION 3

Which three utilities can be used for managing the OCR?

- A. OCRCHECK
- B. OCRDUMP
- C. CRSCTL
- D. OCRCMD
- E. SRVCTL
- F. OCRCONFIG

Correct Answer: CEF

QUESTION 4

You want to install Grid Infrastructure for a cluster and the Oracle Database software (with the RAC option). Do you need SSH user equivalency?

- A. Yes, to ensure security during the installation.
- B. Yes, to set up administrative privileges for the DBA.
- C. Yes, to allow the use of SSH and SCP without being prompted for a pass phrase.
- D. No, you don't need SSH user equivalency.

Correct Answer: C

During the installation of Oracle RAC, OUI needs to copy files to and execute programs on the other nodes in the cluster. In order to allow OUI to do that, you must configure SSH to allow user equivalence. Establishing user equivalence with SSH provides a secure means of copying files and executing programs on other nodes in the cluster without requiring password prompts.

QUESTION 5

Which statement about the Oracle Grid Infrastructure Home is correct?

- A. The directory path must be the same as an Oracle Home directory.
- B. The directory path can be different on different nodes.

C. The directory cannot be created before you install your Oracle software.

D. To create an Oracle Grid Infrastructure path, ensure that it is in a separate path, and not under an existing Oracle base.

Correct Answer: D

D: If you choose to create an Oracle grid infrastructure home manually, then do not create the Oracle grid infrastructure home for a cluster under either the grid installation owner Oracle base or the Oracle Database installation owner Oracle base. Creating an Oracle Clusterware installation in an Oracle base directory will cause succeeding Oracle installations to fail.

/ Requirements for Creating an Oracle Grid Infrastructure Home Directory

During installation, you are prompted to provide a path to a home directory to store Oracle grid infrastructure software. Ensure that the directory path you provide meets the following requirements:

*

(not a) It should be created in a path outside existing Oracle homes, including Oracle Clusterware homes.

*

It should not be located in a user home directory.

*

It should be created either as a subdirectory in a path where all files can be owned by root, or in a unique path.

*

(not C) If you create the path before installation, then it should be owned by the installation owner of Oracle grid infrastructure (typically oracle for a single installation owner for all Oracle software, or grid for role-based Oracle installation owners), and set to 775 permissions.
