### QUESTION 1

Which three statements are true about inheritance?

- A. Inheritance helps to reuse existing code implementations.
- B. It should be possible to substitute the derived class for its base class.
- C. Inheritance allows you to modify the behavior of objects.
- D. Inheritance promotes encapsulation better than interfaces.
- E. The derived class must override all methods of the base class.

Correct Answer: ABC

---

### QUESTION 2

Which statements are true about Java integration technologies?

- A. Remote Method Invocation (RMI) helps to connect subsystems in a loosely coupled manner.
- B. Java Message Service (JMS) helps in synchronous messaging between Java and non-Java systems.
- C. JMS helps to broadcast messages to multiple Java-based receivers.
- D. Java Connector Architecture (JCA) helps to integrate with heterogeneous legacy enterprise information systems.

Correct Answer: C

---

### QUESTION 3

You are the operations architect for a large online retailer. During peak times, your set of monitored applications exhibits non-reproducible errors. The data center is growing at 50% per annum, while your team headcount remains constant.

Which method would you use to implement an effective monitoring strategy?

100% Real QandAs | 100% Real Pass

- A. Use the Visitor pattern to collect per-JVM statistics and store them centrally.
- B. Use the Strategy pattern to encapsulate collection logic for each JVM.
- C. Use the Thread Tracker to monitor the JVMs directly.
- D. Use the Observer pattern to monitor each JVM directly.

Correct Answer: D

---

#### QUESTION 4

Which three actions represent best practices when implementing an exception handling strategy for an application?

- A. Create a custom checked exception if an alternative action can be taken to resolve the exception.
- B. Create a custom unchecked exception if the action to resolve the exception cannot be defined.
- C. Always log the specific exception before re-throwing a wrapped exception.
- D. Always throw exceptions in methods that are designed for exception handling.
- E. Always include information specific to the error when logging an exception.

Correct Answer: ABE

---

#### QUESTION 5

Which three web applications work best when they are designed to be server-push enabled?

- A. A news feed used for providing users with frequently updated news content
- B. A web chat that allows users to communicate using easily accessible web interfaces
- C. A live sporting event application, used to deliver current results during matches
- D. An auction system that provides users with live online bidding
- E. A graphics rendering application that generates visuals in an orderly fashion

Correct Answer: BCD
