QUESTION 1

Given:

11.

```
public class Employee {
```

12.

```
public String name;
```

13.

```
// insert code here
```

14.

15.

```
public String getName() {
```

16.

```
return name;
```

17.

```
}
```

18.

19.

```
public int getSalary() {
```

20.

```
return salary;
```

21.

```
}
```

22.

```
}
```

Which, when inserted at line 13, allows another class to get the value of the salary variable, but NOT change the value of the salary variable?

A. readOnly int salary;

B. secure int salary;

- C. private int salary;
- D. public int salary;
- E. hidden int salary;

Correct Answer: C

QUESTION 2

A business-tier service is being developed that will provide credit card validation. The service is not associated with a specific client, but is available to all clients. The service also has to be as efficient as possible. Which J2EE component matches these needs?

- A. entity bean
- B. stateful session bean
- C. stateless session bean
- D. servlet
- E. JNDI

Correct Answer: C

QUESTION 3

You need to create a class Foo that will record the number of times the go() method is invoked on a particular instance of the class. Which solution correctly implements this goal?

- A. Declare a local variable invokeCount inside the go() method, and increment the variable within the go() method.
- B. Declare an instance variable invokeCount for the class Foo, and increment the variable within the go() method.
- C. Declare a static variable invokeCount for the class Foo, and increment the variable within the go() method.
- D. Declare a method parameter invokeCount as the argument to the go() method, and increment the variable within the go() method.

Correct Answer: B

QUESTION 4

Given:

3.

```
class TestVars {
```

4.

```
int x, y;
```

5.

```
char c;
```

6.

```
// insert code here
```

7.

```
}
```

Which three, inserted independently at line 6, allow the code to compile? (Choose three.)

A. `int z = x/y;`

B. `boolean t = y;`

C. `char d = (char) y;`

D. `boolean bool = "false";`

E. `int x = y++;`

F. `int g = c;`

Correct Answer: ACF

QUESTION 5

Which two are benefits of servlets? (Choose two.)

A. They allow you to embed Java code in HTML files.

B. They represent data in a persistent store.

C. They can produce dynamic content in response to web client requests.

D. Their lifecycles are managed by the container.

Correct Answer: CD
