QUESTION 1

Which two statements are true about digital signatures applied to an XML document? (Choose two.)

- A. The receiver verifies that the message matches the digital signature using its own private key.
- B. The receiver can use an XML Digital Signature for non-repudiation of unsigned data.
- C. The sender creates a digital signature using its own private key and sends that signature along with the original document.
- D. The sender creates a digital signature using its own public key and sends that signature along with the original document.
- E. The receiver verifies that the message matches the digital signature using the sender's public key.

Correct Answer: CE

QUESTION 2

Which three statements are true about JAXP APIs? (Choose three.)

- A. They are a part of Java SE 6.
- B. They allow Java developers to access and process XML data without having to know XML or XML processing.
- C. They do NOT support validation of XML documents against schemas.
- D. It supports the Streaming API for XML.
- E. It requires the Streaming API for XML.
- F. They provide developers with a vendor and parser-implementation independent API to process XML.

Correct Answer: ADF

QUESTION 3

A document-style service defines a document passed to the Web service using xsd:anyType in the WSDL file that describes the service. How should the document be typed in Java?

- A. use javax.xml.soap.Element
- B. use javax.xml.soap.Node
- C. use javax.xml.soap.SOAPHeader
- D. use javax.xml.soap.SOAPElement
- E. use javax.xml.soap.SOAPFault

F. use javax.xml.soap.SOAPBodyElement

Correct Answer: D

QUESTION 4

A company is building a Java EE 5 purchase order processing system. This system will integrate with an external invoicing system as part of the purchase order approval process. A developer created a new client application to access the invoicing system using request-response, but a new service call is receiving errors every time it invokes the necessary Web service.

Which statement is true about the Body element of the SOAP reply message?

- A. It must NOT contain any fault elements.
- B. It will contain a fault element for each error.
- C. It will contain exactly one fault element.
- D. It must contain zero or one fault element.
- E. It must contain an array of fault elements.

Correct Answer: D

QUESTION 5

Which three security technologies are included in WS-Security? (Choose three.)

- A. security pattern injection
- B. encryption
- C. single sign-on
- D. security tokens
- E. digital signatures

Correct Answer: BDE
