QUESTION 1

Which three are top level interfaces in the javax.wireless.messaging package? (Choose three.)

A. MessageListener

B. MessageHandler

C. MessageConnection

D. Datagram

E. Message

F. Connector

Correct Answer: ACE

QUESTION 2

A MIDlet makes its only attempt to register a push connection on a JTWI device using:

PushRegistry.registerConnection(

"datagram://:79", midlet, "10.0.0.???");

Which is true?

A. The call to registerConnection() causes an exception, because the string 10.0.0.??? is an illegal argument.

B. The MIDlet accepts datagram push connections on port 79 only from IP addresses in the range 10.0.0.0 to 10.0.0.255.

C. The MIDlet accepts datagram push connections on port 79 only from IP addresses in the range 10.0.0.100 to 10.0.0.255.

D. The MIDlet accepts datagram push connections on port 79 only from IP addresses in the range 10.0.0.100 to 10.0.0.255 and on any other port from IP addresses other than those in the range 10.0.0.100 to 10.0.0.255.

Correct Answer: C

QUESTION 3

Given:

10. //...

20.

 int[] foo = new int[10000];

21.

 foo = null;

22.

 System.gc();

23.

 //...

Which is true once the program execution reaches line 23?

A. The garbage collector CANNOT reclaim the memory allocated to foo because the reference is nulled out.

B. The garbage collector is triggered but there are no guarantees that any memory has been reclaimed.

C. The garbage collector suspends the program until more memory becomes available.

D. The garbage collector is triggered and memory is guaranteed to be reclaimed.

Correct Answer: B

QUESTION 4

Which is true about the process of updating a MIDlet suite in a JTWI-compliant device?

A. An unsigned MIDlet suite must NOT be allowed to update a signed MIDlet suite.

B. A MIDlet suite CANNOT be updated with the same MIDlet suite from a different URL.

C. The RMS record stores of the updated MIDlet suite are always lost.

D. A MIDlet suite CANNOT be updated with another MIDlet suite that has a lower value for the MIDlet-Version attribute.

Correct Answer: A

QUESTION 5

The binding of networking protocols to a MIDlet at runtime can be compared to a type of relationship. Which relationship most closely matches the binding?

A. caller and callee

B. mark and sweep

C. application and device drivers

D. specification and implementation

Correct Answer: C
